Anti-age technologies based
on peptide and non-peptide
bioregulation

www.peptides.sk

The Peptides Company has been a leader in anti-age technology, peptide and non-peptide bioregulation over the past 10 years.

We develop wellness products that improve the quality of life and delay aging.

We make the achievements of anti-age medicine available to millions of people and give them confidence in their future.

We work for people who want to live an active life, feel young irrespective of age and boldly advance towards their goals.

PART A

SUMMARY LIST OF PEPTIDE CODES	6A
A MODERN WELLNESS CONCEPT of Peptide and Non-Peptide Bioregulation	7A
REVILAB ML – anti-age multifunctional peptide products	8A
RĒVILAB SL – peptide complexes for sublingual administration	12A
PEPTIDE COMPLEXES – complexes in solution, natural peptides	16A
REVILAB ANTI-A.G.E. – a new dawn for modern anti-age medicine	21A
CYTOGENES – peptide bioregulators based on synthesized peptides	22A
CYTOMAXES – peptide bioregulators based on natural peptides	26A
ULTRASEPT – hygienic antiseptic lotion	33A
CYTOGENES LINGUAL – peptide bioregulators based on synthesized peptides in sublingual form	34A
CYTOMAXES LINGUAL – peptide bioregulators based on natural peptides in sublingual form	38A
VOLUSTOM – dietary fiber complex	45A
TREATMENT-AND-PROPHYLACTIC – для здоровья, красоты и активной жизни	46A
COMPLEX 3D – complex based on detoxicants and antioxidants	47A
REVIFORM – program for the correction of weight and shape	64A
MESOTEL – antioxidant natural anti-aging agents	66A
ONCOLOGY SURIES – advanced technologies to combat the disease of the 21st century	68A
AYURVEDA TEA – time-tested tea drinks	70A
COMPLEX NB – promising anti-aging technologies	74A

Summary List of Peptide Codes

AA-14	bronchus
AA-15	lungs and stomach wall
AA-16	prostate
AA-17	muscles
AA-18	cerebral cortex
AA-19	timogen
AA-20	glutathione
AA-21	men's reproductive system

A Modern *Wellness-concept* of Peptide and Non-peptide Bioregulation

We live in a world of high achievement and innovation, where medicine has advanced so much that it has significantly increased people's life expectancy. However, what kind of life will it be? Even at a "mature" age, people want to be slim, vibrant, and active and to enjoy life. How can they accomplish it? How can they remain active throughout their lives?

The Peptides Company deals with these important questions. Founded in 2010, Peptides harnesses its cutting-edge science in the anti-aging industry to research and implement the latest methods for preventing aging, develops and launches peptide and non-peptide bioregulators to prevent the risk of cancer and age-related diseases. Currently, the company offers a range of more than 300 unique products, which have no analogues either in Russia or abroad.

Being a strategic partner of the St. Petersburg Institute of Bioregulation and Gerontology, our company has been working hard to improve the health of the world's population over the past 10 years. The results of long-term research have proved

that peptide bioregulators are able to boost the body's resistance to adverse factors and increase its life span. Preparations based on peptides have a number of undeniable advantages:

- they effectively treat disorders in different body systems;
- they are compatible with each other and can be combined with other medicines;
- they have zero toxicity levels and do not cause withdrawal symptoms.

Our scientists have diligently developed bioregulators for decades, and numerous clinical trials have proved their effectiveness and safety. All products have the necessary certificates and licenses, which are publicly available at company's website.

We are confident that the introduction of these products into the lives of millions of people will significantly improve the quality of their life.

revilab ML

rēvilab ML

01–09

Anti-Aging Multifunctional Peptide Supplements

Multifunctional supplements revilab ML contain complexes of modern short peptides consisting of 2-10 amino acids. The peculiarity of revilab ML anti-age protectors is that they are based on the "all-in-one" principle, i.e. one capsule contains a whole set of peptide and non-peptide regulators targeted for a specific health issue. Each of the 9 products contains a range of short peptides, as well as anti-oxidants and building material for cells.

Revilab ML short peptides help rapidly restore body functions.

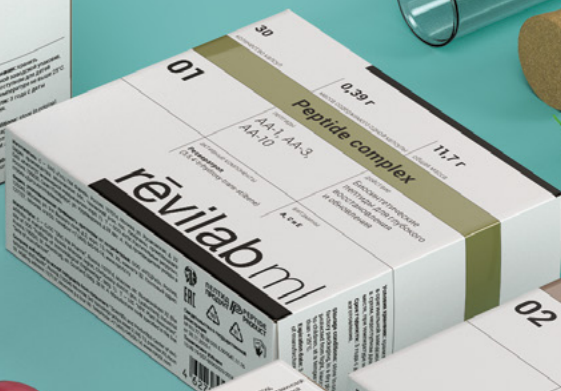

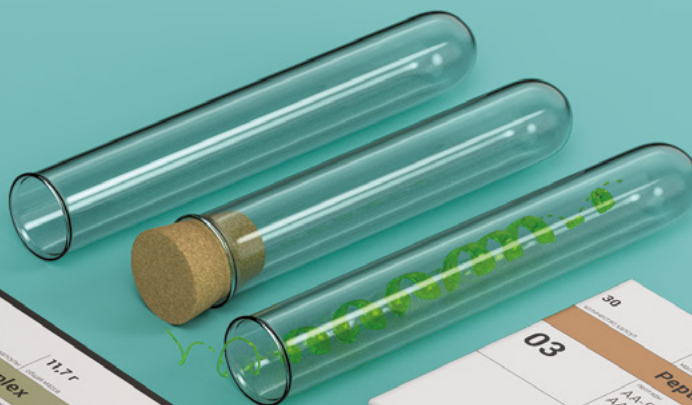

These latest generation bioregulators slow down the aging process, maintain normal metabolic processes, help to prevent and correct various pathological conditions, as well as help individuals rehabilitate after serious diseases, injuries and surgeries.

Recommendations for use:

Adults: one capsule a day, with a meal. Intake duration is 4-6 weeks. Repeat an intake if necessary. Repeated intakes are possible throughout the year.

30 capsules

revilab ML

REVILAB	PURPOSE	AREA OF APPLICATION	ACTIVE INGREDIENTS
ML 01	As anti-age and oncoprotector	<ul style="list-style-type: none"> • For oncopathology prevention • for antioxidant protection of the body • for cerebral circulation improvement • to improve the functioning of the CNS • for the prevention of myocardial infarction and stroke • in case of autoimmune diseases 	Peptide complexes of epiphysis (AA-1), B-link of the immune system (AA-3), liver (AA-10), resveratrol, bitartrate of choline, extract of griffonia, omega-3 polyunsaturated fatty acids, vitamins E, A, C
ML 02	For hematopoietic system, chemo radioprotector	<ul style="list-style-type: none"> • For anemia of various origin • in the treatment of hematopoietic system disorders • to boost immunity • for metabolic disorders • in the complex treatment of cancer patients • to improve the tolerability of chemoradiotherapy • to increase the body's resistance to intoxication and infections 	Peptide complexes T-link of the immune system (AA-2), B-link of the immune system (AA-3), bone marrow (AA-4), liver (AA-10), omega-3 polyunsaturated fatty acids, vitamins E, B6, B9
ML 03	For nervous system and eyes	<ul style="list-style-type: none"> • For inflammatory and degenerative diseases of the nervous system • for the prevention of eye diseases and for eye strain relief • for retina diseases • in acute disorders of cerebral circulation (prevention and rehabilitation) • rehabilitation after head injuries 	Peptide complexes of brain (AA-5), amphiblestrodes (AA-6), vessel wall (AA-7), astaxanthin, bitartrate of choline, omega-3 polyunsaturated fatty acids, vitamins B1, B2, B6, marigold extract
ML 04	For cardiovascular system	<ul style="list-style-type: none"> • To prevent premature aging • for the prevention of atherosclerosis and hypertension • for the prevention of myocardial infarction and stroke • for varicose veins • for trophic ulcers • for thrombophlebitis • for angiopathy 	Peptide complexes of epiphysis (AA-1), vessel wall (AA-7), cardiac muscle (AA-8), resveratrol, rutin, polyunsaturated fatty acids omega-3, vitamin PP
ML 05	For respiratory system	<ul style="list-style-type: none"> • For chronic bronchitis • for pulmonary emphysema • for respiratory allergy • for bronchial asthma • to prevent premature aging 	Peptide complexes of T-link of the immune system (AA-2), bronchus (AA-14), lungs and stomach wall (AA-15), omega-3 polyunsaturated fatty acids, vitamins E, A, licorice root extract

REVILAB	PURPOSE	AREA OF APPLICATION	ACTIVE INGREDIENTS
ML 06	For digestive tract	<ul style="list-style-type: none"> • In case of gastroduodenitis and duodenal ulcer • for cholecystitis • for pancreatitis • in chronic intoxication • for metabolic disorders • for decreased liver function 	Peptide complexes of liver (AA-10), pancreas (AA-11), Lungs and stomach wall (AA-15), omega-3 polyunsaturated fatty acids, extracts: of licorice root, artichoke fruit, plantain leaves, strawberry leaves
ML 07	For men's health	<ul style="list-style-type: none"> • In case of urinary disorders due to prostate diseases • for chronic prostatitis • for benign prostatic hyperplasia • for erectile dysfunction • to increase the functional activity of male body systems • to normalize male hormonal status • to normalize sperm motility 	Peptide complexes of epiphysis (AA-1), vessel wall (AA-7), testicle (AA-12), bladder (AA-13), polyunsaturated fatty acids omega-3, L- carnitine, zinc citrate
ML 08	For women's health	<ul style="list-style-type: none"> • To normalize the functions of the neuroendocrine system • to normalize cyclic processes in the body • to normalize the reproductive system function and increase fertility • to delay and relieve the manifestations of menopause • for cancer prevention • to prevent urinary system disorders • for the prevention of osteoporosis 	Peptide complexes of epiphysis (AA-1), vessel wall (AA-7), cartilage (AA-9), bladder (AA-13), polyunsaturated fatty acids omega-3, resveratrol, arginine
ML 09	For musculoskeletal system	<ul style="list-style-type: none"> • For arthrosis and arthritis • rheumatism • degenerative disc disease • osteoporosis • arthrolithiasis • rehabilitation after injuries 	Peptide complexes of B-link of the immune system (AA-3), vessel wall (AA-7), cartilage (AA-9), polyunsaturated fatty acids omega-3, superoxidismutase, catalase, carnosine

revilab SL

rēvilab SL

01–10

Peptide Complexes for Sublingual Administration

This is the world's first series of multi-component supplements for sublingual administration, designed to prevent dysfunctions of various systems and organs, and to alleviate disease. The effectiveness of this method of application is explained by the fact that the product enters the sublingual space penetrated by a thick vein system located under a thin layer of oral mucous membrane. The active ingredients enter the bloodstream directly, avoiding the portal vein system and first-pass metabolic transformation

in the liver. Due to the direct penetration into the systemic circulation sublingual supplements show fast therapeutic action in comparison with orally ingested bioregulators.

The components of the supplements – peptides and herbal extracts – are seamlessly combined in the revilab SL series and have a targeted effect on the root causes of diseases, and effectively prevent premature aging of the organism.

Recommendations for use:

In the morning, distribute
4-6 drops across the oral mucosa.

10 ml

revilab SL

REVILAB	SUPPORT	AREA OF APPLICATION	ACTIVE INGREDIENTS
SL 01	Cardiovascular system	<ul style="list-style-type: none"> • To prevent atherosclerosis and hypertension • for the prevention of myocardial infarction and stroke • for rehabilitation of post-infarction and post-stroke patients • against varicose veins • against arterial hypertension • against trophic ulcers • against thrombophlebitis • in atherosclerotic vascular disease • against angiopathy 	Peptide complexes of vessel wall (AA-7), cardiac muscle (AA-8), licorice extract, propolis extract, peppermint extract, chamomile extract, clove essential oil, taxifolin
SL 02	Nervous system and eyes	<ul style="list-style-type: none"> • For inflammatory and degenerative diseases of the nervous system • for the prevention of eye diseases and for eye strain relief. • against retina diseases • acute cerebral circulation disorders (prevention and rehabilitation) • rehabilitation after head injuries 	Peptide complexes of brain (AA-5), amphiblestrodes (AA-6), vessel wall (AA-7), licorice extract, propolis extract, peppermint extract, chamomile extract, clove essential oil, taxifolin
SL 03	Immune and neuroendocrine systems	<ul style="list-style-type: none"> • To prevent premature aging • for immunodeficiency • in case of allergies in autoimmune diseases • for cancer prevention • after diseases • in various chronic intoxications • for rehabilitation after heart attack and stroke • after surgery 	Peptide complexes of epiphysis (AA-1), T-link of the immune system (AA-2), B-link of the immune system (AA-3), licorice extract, propolis extract, peppermint extract, chamomile extract, clove essential oil, taxifolin
SL 04	Musculoskeletal system	<ul style="list-style-type: none"> • For arthrosis and arthritis • rheumatism • degenerative disc disease • osteoporosis • arthrolithiasis • rehabilitation after injuries 	Peptide complexes of B-link of the immune system (AA-3), cartilage (AA-9), muscles (AA-17), licorice extract, propolis extract, peppermint extract, chamomile extract, clove essential oil, taxifolin
SL 05	Digestive tract	<ul style="list-style-type: none"> • For chronic pancreatitis • cholecystitis • cirrhosis • chronic intoxication • metabolic disorders • decreased liver function 	Peptide complexes of liver (AA-10), pancreas (AA-11), lungs and stomach wall (AA-15), licorice extract, propolis extract, peppermint extract, chamomile extract, clove essential oil, taxifolin
SL 06	Respiratory system	<ul style="list-style-type: none"> • For chronic bronchitis • pulmonary emphysema • respiratory allergy • bronchial asthma 	Peptide complexes of B-link of the immune system (AA-3), bronchus (AA-14), Lungs and stomach wall (AA-15), licorice extract, propolis extract, peppermint extract, chamomile extract, clove essential oil, taxifolin

REVILAB	SUPPORT	AREA OF APPLICATION	ACTIVE INGREDIENTS
SL 07	Hematopoietic system	<ul style="list-style-type: none"> • For anemia of various origin • hematopoietic system disorders • complex treatment of cancer patients • to boost immunity • for pyoinflammatory diseases and posturgery complications, trophic disorders 	Peptide complexes of B-link of the immune system (AA-3), bone marrow (AA-4), vessel wall (AA-7), vitamin B1, B12, licorice extract, propolis extract, peppermint extract, chamomile extract, clove essential oil, taxifolin
SL 08	Urinary system	<ul style="list-style-type: none"> • For prevention of urinary system diseases • urination disorders • chronic cystitis and pyelonephritis 	Peptide complexes of T-link of the immune system (AA-2), vessel wall (AA-7), bladder (AA- 13), licorice extract, propolis extract, peppermint extract, chamomile extract, clove essential oil, taxifolin
SL 09	Men's health	<ul style="list-style-type: none"> • In case of urinary disorders due to prostate diseases • for chronic prostatitis • benign prostatic hyperplasia • erectile dysfunction • to increase the functional activity of male body systems • to normalize male hormonal status • to normalize sperm motility 	Peptide complexes of epiphysis (AA-1), testicle (AA-12), bladder (AA-13), Lungs and stomach wall (AA-16), licorice extract, propolis extract, peppermint extract, chamomile extract, clove essential oil, taxifolin
SL 10	Women's health	<ul style="list-style-type: none"> • To normalize the functions of the neuroendocrine system • to normalize all the cyclic processes in the body • for biological clock synchronization • to normalize the reproductive system function and increase fertility • to delay and relieve the manifestations of menopause • for cancer prevention • to prevent urinary system disorders, especially during the menopause and in the old age 	Peptide complexes of epiphysis (AA-1), vessel wall (AA-7), bladder (AA-13), licorice extract, propolis extract, peppermint extract, chamomile extract, clove essential oil, taxifolin

SUBLINGUAL ADMINISTRATION REVILAB SL

↓ Application in the sublingual area of the recommended dose of Revilab SL.

Figure 1. The advantages of the sublingual administration of the product.

Sublingual administration is optimal for highly active substances in low concentrations such as peptides. The bioavailability of peptides administered by sublingual method in a solution is due to high density of venous and lymphatic capillaries and vessels in the mucosa and submucosa of the sublingual area. Sublingual administration provides bioavailability which is comparable to subcutaneous injections. Highly active substances that have entered the body by sublingual administration are not exposed to digestive enzymes or aggressive environment of gastric juice and enter the bloodstream bypassing the liver. In its official documents, the World Health Organization stated that sublingual administration is recognized as a worthy alternative to subcutaneous administration.

2-5 min

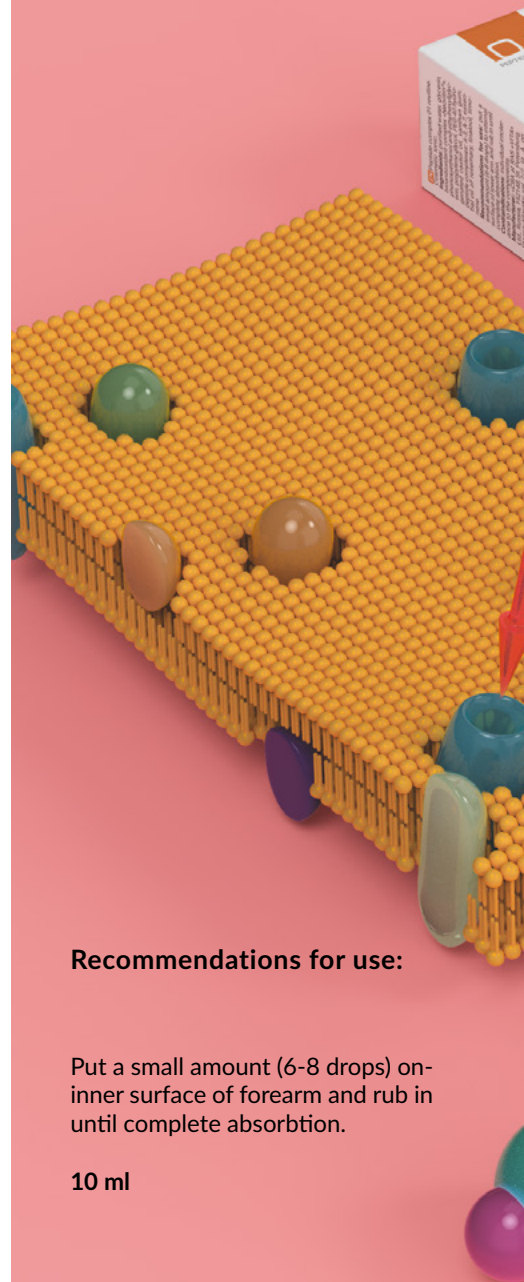

Peptide Complexes 01–19

Peptide Complexes

Prior to this joint development between Peptides and the St. Petersburg Institute of Bioregulation and Gerontology, natural peptide bioregulators were presented either as injectable drugs or as capsules for internal use.

As a result of the productive work of our scientists, a series of natural peptide bioregulators for external use was developed, which has passed the test of time and proved its effectiveness.

The resulting peptide complexes (PCs) are applied to the inner surface of the forearm alongside veins, and rubbed until fully absorbed. After 7–15 minutes, the peptides are bound to the dendritic cells, which then transport them to lymph nodes, where the peptides have to 'change over' and are sent with the blood flow to the target organs and tissues.

Recommendations for use:

Put a small amount (6-8 drops) on inner surface of forearm and rub in until complete absorption.

10 ml

Peptide Complexes

PC	PURPOSE	AREA OF APPLICATION	ACTIVE INGREDIENTS
PC № 1	For arteries and heart	<ul style="list-style-type: none"> • Rehabilitation of post-infarction and post-stroke patients • prevention of atherosclerosis • prevention of hypertension • prevention of heart attack and stroke • premature aging prevention 	Peptides complexes of vessels (A-3), liver (A-7), bioantioxidant complex Neovitin, essential oil of rosemary
PC № 2	For central and peripheral nervous system	<ul style="list-style-type: none"> • For inflammatory and degenerative diseases of the nervous system • prevention of cerebral sclerosis and stroke • rehabilitation after stroke • premature aging prevention 	Peptide complex of brain (A-5), bioantioxidant complex Neovitin, grapefruit essential oil
PC № 3	For immune system	<ul style="list-style-type: none"> • For increased life expectancy • correction of abnormalities of the immune system • stimulation of regeneration of all organs and tissues • prevention of cancer • premature aging prevention 	Peptide complex of thymus (A-6), bioantioxidant complex Neovitin, essential oils of lavender and jasmine
PC № 4	For joints	<ul style="list-style-type: none"> • For arthrosis and arthritis • rheumatism • degenerative disc disease • premature aging prevention 	Peptides complexes of cartilage (A-4), thymus (A-6), bioantioxidant complex Neovitin, essential oil of clove
PC № 5	For bone tissue	<ul style="list-style-type: none"> • In case of fractures • osteoporosis • premature aging prevention 	Peptide complex of cartilage (A-4), bioantioxidant complex Neovitin, essential oil of lemon
PC № 6	For thyroid gland	<ul style="list-style-type: none"> • In case of metabolic disorder • nodular and diffuse goiter • toxic and non-toxic goiter • hypo- and hyperthyroidism • autoimmune thyroiditis • thyroid cyst • mastopathy • premature aging prevention 	Peptide complex of thyroid (A-2), bioantioxidant complex Neovitin, essential oil of sage
PC № 7	For pancreas	<ul style="list-style-type: none"> • For chronic pancreatitis • diabetes mellitus • impaired glucose tolerance • prevention of vascular complications of diabetes • premature aging prevention 	Peptide complex of pancreas (A-1), bioantioxidant complex Neovitin, essential oil of juniper
PC № 8	For liver	<ul style="list-style-type: none"> • In case of metabolic disorder • chronic hepatitis of any etiology • biliary dyskinesia • obesity • cholecystitis • premature aging prevention 	Peptide complex of liver (A-7), bioantioxidant complex Neovitin, essential oil of orange

PC	PURPOSE	AREA OF APPLICATION	ACTIVE INGREDIENTS
PC № 9	For male reproductive system	<ul style="list-style-type: none"> • For chronic prostatitis • prostate adenoma • infertility • erectile dysfunction • premature aging prevention 	Peptide complexes of vessels (A-3), brain (A-5), liver (A-7), bioantioxidant complex Neovitin, essential oil of cinnamon
PC № 10	For female reproductive system	<ul style="list-style-type: none"> • For chronic adnexitis • menstrual disorders • menopause • low libido • premature aging prevention 	Peptide complexes of vessels (A-3), brain (A-5), thymus (A-6), bioantioxidant complex Neovitin, essential oil of sandalwood
PC № 11	For urinary system	<ul style="list-style-type: none"> • For chronic pyelonephritis • interstitial nephritis • glomerulonephritis • premature aging prevention • chronic renal failure prevention • urolithiasis 	Peptide complexes of vessels (A-3), thymus (A-6), bioantioxidant complex Neovitin, essential oil of tea tree
PC № 12	For bronchopulmonary system	<ul style="list-style-type: none"> • For chronic bronchitis • pulmonary emphysema • respiratory allergy • bronchial asthma • premature aging prevention 	Peptide complexes of vessels (A-3), cartilage (A-4), thymus (A-6), bioantioxidant complex Neovitin, essential oil of peppermint
PC № 13	For skin	<ul style="list-style-type: none"> • For improvement of skin color, tone, relief and texture • skin diseases • premature aging prevention 	Peptide complexes of vessels (A-3), cartilage (A-4), liver (A-7), bioantioxidant complex Neovitin, essential oil of jasmine
PC № 14	For veins	<ul style="list-style-type: none"> • For prevention of thrombosis • varicose veins • hemorrhoids • thrombophlebitis • trophic ulcers • premature aging prevention 	Peptide complex of vessels (A-3), bioantioxidant complex Neovitin, essential oil of lavender
PC № 15	For kidneys and urinary bladder	<ul style="list-style-type: none"> • For renal failure prevention • chronic pyelonephritis, cystitis • urinary tract abnormalities • urolithiasis • glomerulonephritis • nephroptosis • premature aging prevention 	Peptides complexes of thymus (A-6), kidneys (A-9), bladder (A-12), bioantioxidant complex Neovitin, essential oil of marjoram

Peptide Complexes

PC	PURPOSE	AREA OF APPLICATION	ACTIVE INGREDIENTS
PC № 16	For stomach and duodenum	<ul style="list-style-type: none"> • For gastric ulcer and duodenal ulcer • prevention of gastrointestinal tract cancer • premature aging prevention • digestive disorders • gastritis 	Peptides complexes of pancreas (A-1), thymus (A-6), liver (A-7), gastric mucosa (A-100), bioantioxidant complex Neovitin, essential oil of orange, essential oil of ylangylang
PC № 17	For eyes	<ul style="list-style-type: none"> • For retinal detachment and degeneration • initial stages of glaucoma and cataract • retinal angiopathy in patients with hypertension and diabetes • optic nerve atrophy • vitreous body pathology • accommodation spasm • premature aging prevention 	Peptides complexes of vessels (A-3), brain (A-5), eye tissue (A-11), bioantioxidant complex Neovitin, essential oil of chamomile
PC № 18	For acoustic analyzer	<ul style="list-style-type: none"> • For initial stages of sensorineural hearing loss • otitis and its consequences • eardrum damage • noise injury, blast injury • premature aging prevention 	Peptides complexes of vessels (A-3), cartilage (A-4), brain (A-5), thymus (A-6), bioantioxidant complex Neovitin, essential oils of lavender
PC № 19	For weather-sensitive and cardio patients	<ul style="list-style-type: none"> • For weather sensitivity problems • migraine • coronary heart disease, heart failure • myocarditises • myocardiodystrophies • premature aging prevention 	Peptides complexes of vessels (A-3), brain (A-5), heart muscle (A-14), bioantioxidant complex Neovitin, essential oils of pine and peppermint

revilab anti-A.G.E. —
a new dawn
for modern
anti-age medicine

Highly effective anti-age complex with de-glycating and antioxidant effect, to protect the body from advanced glycation end-products (A.G.E.).

30 capsules by 0,3 g

Cytogenes

Cytogenes

Peptide Bioregulators Based on Synthesized Peptides

Science does not stand still, and over time, an active amino acid sequence was revealed that triggers the necessary changes in cells. Bioregulators were developed based on short peptides.

Short peptides have a faster effect, triggering the restorative function of internal organs at the initial stage of the product use. In the future, to maintain the positive dynamics in therapy, cytomaxes are recommended. Cytogenes can be taken both for preventive and therapeutic purposes. For the prevention of

disorders of various systems and organs, it is recommended to take one capsule twice a day during meals for thirty days. When it is used for the treatment of the existing disorders as a part of the complex therapy, the product is administered two to three times a day, two capsules at a time, thirty days.

Recommendations for use:

1-2 capsules 1-2 times a day, with meal. The duration of admission is 10-30 days. It is recommended to repeat the intake in 4-6 months.

20/60 capsules by 0,2 g

Cytogenes

PRODUCT NAME	PURPOSE	AREA OF APPLICATION	ACTIVE INGREDIENT
VESUGEN® 	Contributes to blood vessels functional state normalization	<ul style="list-style-type: none">• For varicose veins• arterial hypertension• trophic ulcers• thrombophlebitis• atherosclerotic vascular disease• angiopathy	Peptide complex AC-2 contains vessels peptide
CRYSTAGEN® 	Contributes to the normalization of the functional state of the immune system	<ul style="list-style-type: none">• For immunodeficiency• after diseases• for various chronic intoxications• for rehabilitation after heart attack and stroke• after surgery• for cancer prevention	Peptide complex AC-6 contains thymus peptide

Research and conclusions:

The effect of peptide bioregulators is being investigated at the Saint Petersburg Institute of Bioregulation and gerontology

The experience of using cytomaxes and cytogens for several decades has been accumulated among more than 15 million consumers

Thanks to peptides, the duration of **life is increased by 30-38%**

75-95%

the average effectiveness of peptides-based supplements was estimated

Cytomaxes

Peptide Bioregulators Based on Natural Peptides

St. Petersburg Institute of Bioregulation and Gerontology has developed an exclusive high-performance technology for isolating low-molecular peptide fractions from animal organs and tissues.

Geroprotectors created on the basis of natural peptides help to slow down premature aging and normalize metabolic processes in the cells of the body, triggering their natural renewal process,

reduce the risk of cancer and increase life expectancy.

Positive results from cytomaxes administration have been proven by long-term clinical studies. These peptide bioregulators have no side effects, because the peptides they contain are naturally present in the human body.

Recommendations for use:

1-2 capsules 1-2 times a day, with meal. The duration of intake is 10-30 days. It is recommended to repeat the intake in 4-6 months.

20/60 capsules by 0,2 g

PRODUCT NAME	PURPOSE	AREA OF APPLICATION	ACTIVE INGREDIENT
PIELOTAX®	It has a selective action on the cells of kidney tissues and normalizes the metabolism in the tissues.	<ul style="list-style-type: none"> • For urolithiasis • nephroptosis • urinary tract abnormalities • chronic pyelonephritis, cystitis, glomerulonephritis • renal failure • nephropathy of various origin, including diabetic nephropathy 	Peptide complex of kidneys (A-9)
SIGUMIR®	It has a selective effect on various cells of cartilage and bone tissue, normalizes metabolism in the cells and improves the functioning of the joints and spine.	<ul style="list-style-type: none"> • For arthrosis and arthritis • rheumatism • degenerative disc disease • osteoporosis • arthrolithiasis 	Peptide complex of cartilage (A-4)
STAMAKOTR®	It has a selective effect on the cells of the gastric mucosa and normalizes metabolism in those cells.	<ul style="list-style-type: none"> • For gastritis, gastroduodenitis • for gastric ulcer and duodenal ulcer • after gastric tumor surgery • for chronic pancreatitis • for digestive disorders • to compensate for inadequate and poor quality nutrition • when using weight-reducing diets 	Peptide complex of gastric mucosa (A-10)
SUPREFORT®	It has a selective effect on various cells of the pancreas, normalizes metabolism in those cells and improves their functioning.	<ul style="list-style-type: none"> • For lipid and carbohydrate metabolism normalization • for diabetes mellitus types I and II • for the prevention of diabetes in people aged 50 and older • to compensate for inadequate and poor quality nutrition • when using weight-reducing diets 	Peptide complex of pancreas (A-1)

PRODUCT NAME	PURPOSE	AREA OF APPLICATION	ACTIVE INGREDIENT
SVETINORM®	It has a selective effect on various liver cells, normalizes metabolism in those cells and improves liver function.	<ul style="list-style-type: none"> • For metabolic disorders • for decreased liver function • for chronic hepatitis of different etiology • for chronic intoxication • for skin diseases • for lipid metabolism normalization in case of atherosclerosis and obesity • to compensate for inadequate and poor quality nutrition • when using weight-reducing diets 	Peptide complex of liver (A-7)
TAXOREST®	It has a selective effect on bronchial cells, normalizes metabolism in those cells and improves their functioning	<ul style="list-style-type: none"> • For chronic bronchitis • for smoker's bronchitis • for bronchial asthma • for chronic obstructive pulmonary disease • for chronic cardiac deficiency, • after diseases of bronchial tubes and lungs of various genesis 	Peptide complex of bronchial mucosa (A-19)
TESTOLUTEN®	It has a selective effect on male reproductive system cells, normalizes metabolism in those cells and increases spermatozoa mobility	<ul style="list-style-type: none"> • For increase in functional activity of male organism, • normalization of male hormonal status, • strengthening of libido, • strengthening of erectile function, • normalization of spermatozoa mobility 	Peptide complex of testes (A-13)
THYREOGEN®	It has a selective effect on thyroid cells, normalizes metabolism in those cells and improves their functioning	<ul style="list-style-type: none"> • For metabolic disorders, • prevention of thyroid gland diseases, • hypo- and hyperthyrosis, • autoimmune thyroiditis. 	Peptide complex of thyroid (A-2)
CERLUTEN®	It has a selective effect on nervous tissue and brain cells, normalizes their metabolism, and increases their functional activity	<ul style="list-style-type: none"> • For normalization of brain activity in case of atherosclerosis, • during rehabilitation after stroke and craniocerebral trauma, • to decrease in memory and violation of attention concentration, • Alzheimer and Parkinson's diseases, • disseminated sclerosis, • syndrome of chronic fatigue, • depression, • neuralgia and neuritis, • emotional instability, especially of elderly people. 	Peptide complex of brain (A-5)

Cytomaxes

PRODUCT NAME	PURPOSE	AREA OF APPLICATION	ACTIVE INGREDIENT
CHELOHART®	It has a selective effect on myocardial cells, normalizes their metabolism in cardiomyocytes	<ul style="list-style-type: none"> • For coronary heart disease, • hypertension, • myocardites, • postinfarction cardiosclerosis, • myocardiodystrophies of various genesis, • cardiac deficiency, • intensive physical activities and malnutrition 	Peptide complex of heart muscle (A-14)
CHITOMUR®	It has a selective effect on bladder wall cells, normalizes their metabolism, stimulates detrusor and sphincter muscle tone	<ul style="list-style-type: none"> • For chronic cystitis, • urination disorders caused by prostate diseases, • urination disorders caused by menopause, • a spinal bladder, • urine incontinence caused by omission of women pelvic organs 	Peptide complex of bladder (A-12)
ENDOLUTEN®	It has a selective effect on neuroendocrine system cells, normalizes metabolism in the epiphysis cells and melatonin secretion, regulates hormonal metabolism, has a regulatory effect on the epiphysis in particular and on the whole organism	<ul style="list-style-type: none"> • For normalization of neuroendocrine system function, • normalization of all cyclic processes in organism, • synchronization of biological clock, • normalization of reproductive system activity and increase in fertility (reproductive ability), • delay and smoothing of climax manifestations, • prevention of oncological diseases, • increase in immunity, • prevention of presenilation and increase in life expectancy. 	Peptide complex of epiphysis (A-8)

Lingual Cytogenes

Synthesized Peptide-based Bioregulators for Sublingual Administration

Cytogene class peptides for sublingual administration are a renewed classic. Sublingual drugs have a number of advantages: no waste of time, no partial hydrolysis, immediate absorption by the sublingual vein system. The daily dose of pep-

tides was reduced by half as compared to capsule «Cytogen» mono-peptides. The dosage strength of cytogene is 10 mg in 1 ml. So, the new generation of drugs has an important advantage – they provide doctors with an opportunity to select an individual dose for each clinical case.

Recommendations for use:

adults are recommended to take under the tongue 5–6 drops (0.25–0.35 ml) for 10–15 minutes before eating 3–4 times a day. The duration of admission is 1 month. It is recommended to repeat the intake in 3–6 months.

Visulingual®

10 ml

VISULINGUAL®

We are proud to represent a unique combined sublingual product based on synthesized peptides developed by the St. Petersburg Institute of Bioregulation and Gerontology at the requests of ophthalmologists.

Vizulingval® is a combined product that contains 4 peptide complexes consisting of 3 amino acids each:

AC-2 stabilizes the functionality of blood vessels;

AC-5 stabilizes the functionality of brain cells;

AC-6 stabilizes the functionality of immune system cells;

AC-7 stabilizes the functionality of retinal cells.

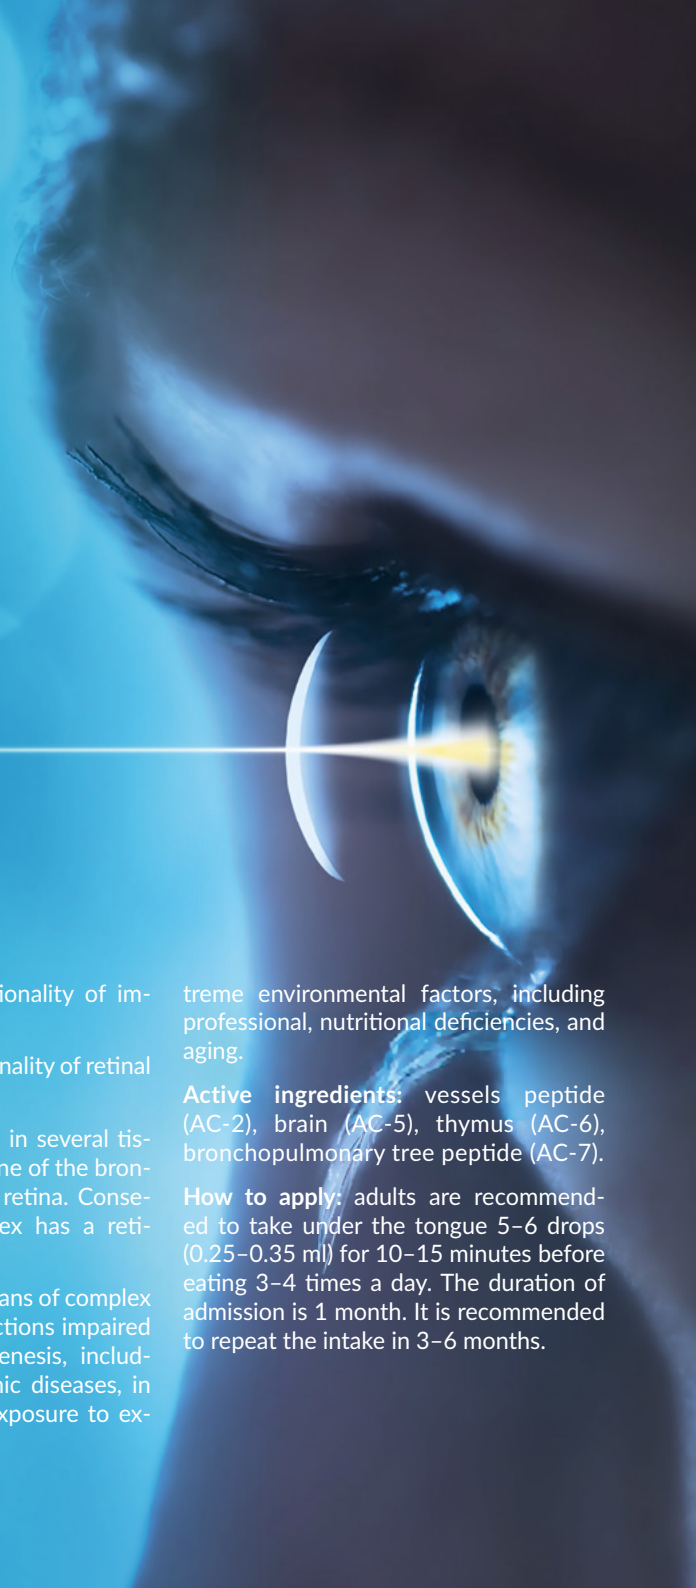

AC-7 is biologically active in several tissues: the mucous membrane of the bronchi, the stomach and the retina. Consequently, the AC-7 complex has a retina-protective effect.

It is recommended as a means of complex recovery of the visual functions impaired by diseases of various genesis, including degenerative-dystrophic diseases, in pathological conditions, exposure to ex-

treme environmental factors, including professional, nutritional deficiencies, and aging.

Active ingredients: vessels peptide (AC-2), brain (AC-5), thymus (AC-6), bronchopulmonary tree peptide (AC-7).

How to apply: adults are recommended to take under the tongue 5–6 drops (0.25–0.35 ml) for 10–15 minutes before eating 3–4 times a day. The duration of admission is 1 month. It is recommended to repeat the intake in 3–6 months.

Lingual Cytomaxes

Natural Peptide-Based Bioregulators for Sublingual Administration

The new line of lingual peptide bioregulators includes supplements of the Cytomax class. The concentration of the active substance in them differs from that in encapsulated preparations. This decision is due to a new form of use of bioregulators, since it provides a higher availability of the supplement and the speed of its action.

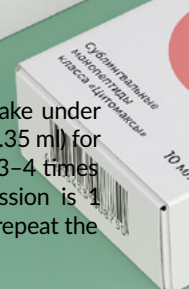

In addition, thanks to the sublingual form of administration, it has become much easier to adjust the dose, depending on the response and needs of the person.

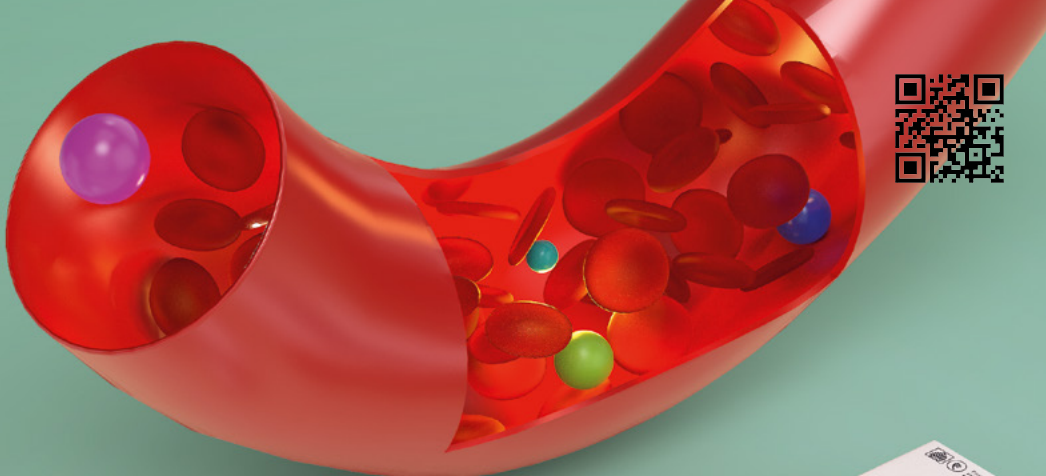

Lingual cytomax, like classic encapsulated ones, are intended for certain systems of the human body or individual organs. By displaying biological activity in relation to certain tissues, lingual cytomaxes contribute to ensuring the functional activity of the organ at a level that corresponds to a person's age and his general condition.

Recommendations for use:

adults are recommended to take under the tongue 5–6 drops (0.25–0.35 ml) for 10–15 minutes before eating 3–4 times a day. The duration of admission is 1 month. It is recommended to repeat the reception in 3–6 months.

Peptide complex of brain (A-5)

Lingual Cytomaxes

PRODUCT NAME	PURPOSE	AREA OF APPLICATION	ACTIVE INGREDIENT
CHELOHART® LINGUAL	It has a selective effect on myocardial cells, normalizes their metabolism in cardiomyocytes	<ul style="list-style-type: none"> • For coronary heart disease, • for hypertension, • for myocardites, • for postinfarction cardiosclerosis, • for myocardiodystrophies of various genesis, • for cardiac deficiency, • in case of intensive physical activities and malnutrition 	Peptide complex of heart muscle (A-14)
CHITOMUR® LINGUAL	It has a selective effect on bladder wall cells, normalizes their metabolism, stimulates detrusor and sphincter muscle tone	<ul style="list-style-type: none"> • For chronic cystitis, • for violations of urination caused by prostate diseases, • for violations of urination caused by menopause, • at a spinal bladder, • for urine incontinence caused by omission of women pelvic organs 	Peptide complex of bladder (A-12)
ENDOLUTEN® LINGUAL	It has a selective effect on neuroendocrine system cells, normalizes metabolism in the epiphysis cells and melatonin secretion, regulates hormonal metabolism, has a regulatory effect on the epiphysis in particular and on the whole organism	<ul style="list-style-type: none"> • For normalization of neuroendocrine system function, • normalization of all cyclic processes in organism, • synchronization of biological clock, • normalization of reproductive system activity and increase in fertility (reproductive ability), • delay and smoothing of climax manifestations, • prevention of oncological diseases, • increase in immunity, • prevention of presenilation and increase in life expectancy. 	Peptide complex of epiphysis (A-8)

Volustom® — dietary fiber complex. Creates a favorable environment for symbiotic microflora, prevents the development of inflammatory diseases of the gastrointestinal tract and normalizes its work.

Active ingredients: Whole apple powder, chicory inulin, bamboo fibre, oat fibre, apple fibre, chicory oligofructose, psyllium husks (*Plantago ovata*), ground flax seeds, cinnamon powder, apple pectin, curcuma powder, ginger powder, natural sweetener stevioside. **Bulk:** 150 g

Recommendations for use: Dilute 1 teaspoon (5 g) of the concentrate powder with 100–150 ml of room temperature water, wait for 1–2 minutes and drink. It's important to drink more water after using the product. Take it 1–2 times a day. In the morning 30 minutes before eating, in the evening 3–4 hours after eating. It is recommended to increase the usual daily amount of liquid consumed during the intake of Volustom concentrate.

Supplements in the Prevention and Treatment of Diseases

A Way to Health, Beauty and Active Life

Nowadays, various medicinal and preventive drugs enable us to significantly improve the quality of life and slow down body aging processes. The line of modern non-peptide parapharmaceuticals is based on advanced anti-aging science and is devised as a supplement

to the basic revitalization program with peptide bioregulators at its core.

The complex use of our products helps normalize metabolic processes, restore impaired functions of organs and body systems without harmful side effects, and provides an individual with the op-

portunity to stay healthy, vibrant and active for years to come.

In combination with peptide bioregulators, this class of parapharmaceuticals reduces the risk of cancer and age-related diseases.

Complex 3D®

detoxicant and antioxidant

 30 capsules of 0,4 g

Complex 3D is based on detoxicants and antioxidants. Due to the presence of such active ingredients as tripeptide glutathione, SOD and catalase, dihydroquercetin, the supplement is able to solve several problems at once: slow down the aging at the cellular level, prevent intoxication caused by the glycation process, and provide regenerative, anti-inflammatory, immunoprotective and angio- and hepatoprotective effects.

Reduces the level of chronic inflammation in the connective tissue and vascular wall, what is especially important for atherosclerosis, phlebitis.

Recommended for varicose veins, for the prevention of atherosclerosis and hypertension, for liver dysfunction, chronic intoxication, chronic inflammation syndrome (damage to the elements of the connective tissue in the joints, skin, blood vessels), for oxidative stress, diseases of the cardiovascular system, for the prevention of accelerated aging.

Active ingredients: brewer's yeast, enriched with selenium, L-cysteine, dihydroquercetin, catalase, vitamin E, barley extract (contains superoxide dismutase), vitamin A, glutathione.

Recommendations for use: one capsule per day during meals. Intake duration is 4–6 weeks. If necessary, you can repeat the intake. Repeated intakes are possible throughout the year.

Supplements in the Prevention and Treatment of Diseases

Imusil®

immune protector

It is a natural immune restorer based on vital lacto- and bifidobacteria and fragments of their cell wall in combination with Echinacea and ascorbic acid. It activates all components of the immune system and reduces the risk of cancer.

It is recommended for patients with dysbacteriosis, frequent colds, allergies, chronic diseases of the gastrointestinal tract, lungs, heart, liver, nervous system; those with regular exposure to harmful substances at manufacturing facilities, as well as those taking antibiotics, suffering from obesity, high physical activity, or to prevent cancer.

Active ingredients: yeast probiotic bifidobacteria, extract of the herb echinacea, vitamin C, yeast probiotic lactobacillus.

Recommendations for use: one capsule 2 times a day with meal. Duration of intake is 2-3 weeks. You may repeat the use of Imusil throughout the year.

 20 capsules of 0.31 g

Calsil-T®

a source of calcium and magnesium

It is a non-peptide bioregulator based on calcium, magnesium and vitamins A, D and E that extends active longevity. It affects the key links in the pathogenesis chain of accelerated aging, restoring impaired immune and antioxidant status. It is a proven means of preventing osteoporosis and oncopathology.

It is recommended for patients with cerebral disease, hypertension and coronary heart disease, blood clotting disorders, osteoporosis, depression and insomnia, memory disorders, dizziness and headache, tinnitus, rheumatoid polyarthritis, osteochondrosis; those under mental and physical stress, with fractures, impaired vision, hepatitis, skin diseases, diabetes mellitus, menopause, as well as a means to prevent premature aging.

Active ingredients: calcium citrate, calcium carbonate, magnesium citrate, vitamin premix containing vitamin A, D and E.

Recommendations for use: one tablet 2 times a day chewing with meal. Duration of intake is 1 month. Repeated intakes are possible throughout the year.

 20 tablets of 1.0 g

Zinsil-T®

a Source of zinc

It is a complex preparation based on zinc, glycine and pyridoxine. It effectively prevents premature aging, corrects the work of many enzymes and hormones, and restores impaired immune and antioxidant status of an individual. The product has proved its effectiveness as an anti-cancer agent.

It is recommended for patients with decreased immune and antioxidant capacity, after strokes and brain injuries, in case of stress and insomnia, allergies and skin diseases, disorders of carbohydrate and lipid metabolism, diabetes mellitus, atherosclerosis and vegetative-vascular dystonia, hypertension, as well as a means to prevent premature aging.

Active ingredients: glycine, zinc citrate, vitamin B₆.

Recommendations for use: one tablet 2 times a day chewing with meal. Duration of intake is 1 month. Repeated intakes are possible throughout the year.

 20 tablets of 1.0 g

Olecap®

cardiovascular support

It is a preparation based on omega-3 and omega-6 polyunsaturated fatty acids, tocopherols and tocotrienols. It effectively inhibits the growth of atherosclerotic plaques and reduces blood cholesterol levels. It has strong antioxidant properties.

It is recommended for patients with disorders of adipose metabolism, high blood cholesterol levels, atherosclerosis, diabetes mellitus, allergies, hypertension and coronary artery disease; for prophylaxis of heart attack and stroke, as well as after chemotherapy.

Active ingredients: cold-water salmon oil, linseed oil, vitamin A and vitamin E.

Recommendations for use: one capsule 2-3 times a day. Duration of intake is 4-6 weeks. Repeated intakes are possible throughout the year.

 30 capsules of 840 mg

Supplements in the Prevention and Treatment of Diseases

Regenart®

joints and liver protection

It is a complex product aimed at supporting joint function and normalizing liver function. It accelerates regeneration of cartilage tissue and joint surfaces, improving joint mobility. An equally important purpose of the product is to restore the liver's functional activity. It accelerates detoxification processes in the liver, an organ considered to be a laboratory responsible for metabolic processes. For this reason, any impairment of liver function has a negative impact on cartilage tissue. Improvements in liver function enhance the regenerative capacity of cartilage tissue.

It is recommended for patients with artrosis, arthritis, osteochondrosis, chronic liver diseases and biliary tract diseases. It prevents the development of cirrhosis and hepatosis.

Active ingredients: dandelion root extract, chondroitin sulfate, artichoke extract, dihydroquercetin.

Recommendations for use: one capsule 2 times a day with meal. Duration of intake is 1 month. Repeated intakes are possible throughout the year.

 20 capsules of 0.30 g

Ardiliv®

Liver Recovery

This is a complex product that has several effects: it stimulates the regeneration of liver cells, activates detoxification processes and has an antioxidant effect. It also enhances the regeneration of liver cells after viral and toxic damage.

The product prevents liver cirrhosis, can normalize the liver function and achieve sustainable positive results in patients with various forms of hepatitis.

It is recommended for patients with chronic intoxications, viral, toxic, alcoholic and medicinal hepatitis, reduced detoxification and protein-forming liver function, fatty hepatosis and cirrhosis, to prevent liver adenocarcinoma.

Active ingredients: extracts: red leaf grape fruit, artichoke, herb extract of wild strawberry, dihydroquercetin, resveratrol.

Recommendations for use: 1-2 capsules 2 times a day with meal. Duration of intake is 1 month. Repeated intakes are possible 3-4 times a year.

 30 capsules of 0.30 g

Renefort®

kidney protection

It is a multi-component product that helps maintain optimal urinary system function. It has anti-inflammatory, antioxidant, medium spasmolytic and diuretic effects. It increases the solubility of urinary stones consisting of salts of uric acid and oxalic acid. Limits the rate of progression of renal failure.

It is recommended for patients with chronic pyelonephritis and glomerulonephritis, cystitis, nephroptosis, vesical calcification, abnormal development of the urinary tract and chronic renal failure.

Active ingredients: a sheet of cranberries, horsetail herb, hesperidin, rose hips extract, rosemary extract, beta-carotene, vitamin C, superoxide dismutase, hibiscus extract, vitamin E, coenzyme Q10, dihydroquercetin.

Recommendations for use: one capsule 2 times a day with meal. Duration of intake is 4-6 weeks. Repeated intakes are possible throughout the year.

 20 capsules of 0.41 g

Gelmigon®

parasite control

It is a non-peptide bioregulator based on several herbal components, with a wide range of preventive antiparasitic effects. Its effectiveness is due to the creation of the necessary concentration of substances in the body that are intolerable to parasites but safe for humans. Active ingredients that have proved their effectiveness in the fight against the main types of helminths parasitizing in the gastrointestinal tract increase the body's resistance and are completely safe for health.

It is recommended as a means to prevent parasitic invasions of various etiologies, allergic reactions caused by helminths, chronic fatigue syndrome, and for the prevention of gastrointestinal dysfunctions caused by helminthic invasion.

Active ingredients: fruit extract emblica (amla), plantain leaf, horsetail herb powder, fenugreek seeds, clove powder, garlic powder, yarrow herb extract, powder ginger root, powder buckthorn bark, anise seed, licorice root, extract of walnut leaves, fruit extract of artichoke, cinnamon powder.

Recommendations for use: one capsule 2-3 times a day with meal. Duration of intake is 1 month. Repeated intakes are possible 3-4 times a year.

 30 capsules of 0.41 g

Supplements in the Prevention and Treatment of Diseases

Panaxod®

stomach and duodenum protection

The product is based on the superoxide dismutase (SOD) enzyme, which improves the functional state and accelerates recovery in standard therapy for gastric and duodenal ulcer. It quickly eliminates the pain syndrome, reduces the duration of scarring of ulcers, and significantly reduces the severity of endoscopic and histological manifestations of inflammatory reactions in the perulcerative mucous membrane.

It is recommended for patients with gastrointestinal diseases accompanied by inflammation. It is used in the standard therapy of gastric and duodenal ulcer, gastritis, and is a highly effective cure for helicobacter infection.

Active ingredients: superoxide dismutase, biomass of ginseng, rutin, nicotinamide

Recommendations for use: one capsule 3-4 times a day, with morning and afternoon meals. Duration of intake is 2-3 weeks.

 60 capsules of 0.17 g

Trezvon®

intoxication relief

A non-peptide bioregulator that eliminates intoxication of various genesis, including alcohol.

Contains biologically active agents that produce anti-inflammatory, hypolipidemic, hepatoprotective and bile-expelling effects. Guarantees antineoplastic, antiviral and bactericidal effects. Provides neuroprotective, antistress, sedative effects. Improves metabolic processes in brain tissue, restores sleep patterns, increases resistance of neurons to intoxication.

Active ingredients: birch leaf extract, glycine, lemon balm herb, cinnamon powder, choline bitartrate, burdock root extract, artichoke extract, thyme extract, bay leaf powder.

Recommendations for use: 1 tablet 1-2 times a day with meals. If necessary, the dose can be increased up to 4 tablets per day.

 10 tablets of 0.71 g

Revimite®

a source of vitamins and microelements

This nutraceutical product compensates for the deficit of microelements and other useful substances in the body. It fills the deficit of B vitamins and iron (Fe). It has an immunomodulatory and antioxidant effect. The product is recommended for immune support, in cases of reduced antioxidant status, metabolic disorders, atherosclerosis, diabetes mellitus, anemia of various genesis, diet and starvation, as part of comprehensive weight correction programs, and in cases of increased physical activity.

Active ingredients: pomegranate juice concentrate, soy lecithin, pectin, oat grass extract, echinacea purpurea extract, green tea extract, grape seed extract, soy isoflavones, yeast extract, dried ginger, pyrophosphate of iron, cloves, Vitamin B₃ (nicotinamide), Vitamin B₆ (pyridoxine hydrochloride), Vitamin B₁ (thiamine hydrochloride).

Recommendations for use: 1 teaspoon (10 g) eat alone or with any product.

 100 g

Adestab®

vascular and heart support

It is a mild hypotensive and angiotropic product that prevents heart attacks and strokes. It improves the metabolism in the vascular wall and maintains its healthy integrity. Its course application helps stabilize blood pressure and significantly reduce the risk of vascular complications in the body.

It is recommended as a means to stabilize blood pressure, prevent thrombosis, reduce tides during menopause, improve myocardial trophic and reduce weather dependence.

Active ingredients: potassium chloride, magnesium citrate, powder of the aroma fruits, powder of melissa herb, powder of calendula flowers, hop cone powder, powder of fennel seed, hawthorn extract, horsetail extract.

Recommendations for use: 1 capsule 3-4 times a day, with morning and afternoon meals. Duration of intake is 2-3 weeks.

 60 tables of 1.0 g

Supplements in the Prevention and Treatment of Diseases

Actiman®

men`s health support

A multicomponent preparation that supports men's urinogenital system. Im-proves trophic processes in the prostate gland, testicles and epididymis. Improves processes of spermatozoa maturation and motility in ejaculate. Reduces stagnant and inflammatory processes in the small pelvis. Im-proves blood supply of the cavernous bodies of the penis. Slows down growth of prostate adenoma.

Recommended for patients with impaired erectile function, chronic stagnant prostatitis, prostate gland adenoma, decrease of libido, premature ejaculation, decrease in quality of ejaculate.

Active ingredients: L-arginine, L-carnitine, acetyl-L-carnitine, extract sabal palm, extract flowers of a cactus Opuntia, extract pumpkin seeds, pidzheuma bark extract, extract muira puama, extract epimediuma.

Recommendations for use: men by one capsule 2 times daily with meals. Duration of intake is month. Repeated intake are possible 3-4 times a year.

 30 capsules of 0.39 g

Mamiton®

anti-cancer agent for the female reproductive system

A non-peptide bioregulator that boosts the female reproductive system, raises the immune status, produces a strong antioxidant, anti-mitotic, estrogen-blocking effect, prevents cancer. Not only does resveratrol contained in the preparation prevent the development of malignant neoplasms, but it also reduces the risk of osteoporosis, and stimulates collagen syn-thesis, thus improving skin and hair condition.

Recommended for patients with mastopathy, as a means of smooth and soft correction of the endocrine system; treatment of fibroid, endometriosis, ovarian cysts; optimization of the female hormonal status, disturbed menstrual cycle, prevention of cancer.

Active ingredients: motherwort's root extract, rosehip fruit extract, nettle leaf extract, vitamin E, resveratrol, horsetail herb extract, kelp thallus extract, herbs knotweed extract, herbs peppermint extract, hop cones extract, walnuts pericarp extract, vitamin A.

Recommendations for use: one capsule 1-2 times a day with meal. Duration of intake is 1 month. Repeated intakes are possible 3-4 times throughout the year.

 60 capsules of 0.39 g

Femalin®

women's health support

Improves functions of the female organism. Influences the hormonal status of the female body and helps to cope with hormonal, sexual and psychosomatic problems.

Recommended as a means of correction of the menstrual cycle, reduction of pelvic and lumbar pains during periods; enhances sensitivity of genital tracts, prevents anorgasmia, ovarian dysfunction; alleviates menopause symptoms, increases libido, improves neuroendocrine balance, normalizes sleep patterns, eliminates neuroses, depressions, improves arterial blood pressure and cardiac performance, helps normalize weight, blood sugar level and mineral metabolism during menopause.

Active ingredients: L-arginine, dioscorea opposite root extract, muira puama bark extract, yohimbe bark extract, resveratrol.

Recommendations for use: one capsule a day, with meal. Duration of intake is 1 month. Repeated intakes are possible throughout the year.

 30 capsules of 0.43 g

Proteston®

masculine health protection

Proteston is a multicomponent peptide-based bioregulatory preparation that improves the functions of the male reproductive system.

A combination of dipeptide that stimulates the functions of the male reproductive system, and useful active components — extracts of reindeer antlers, gemolene, pygeum bark extract, zinc and selenium — helps prevent aging and effectively corrects the work of the male genitourinary system.

Recommended as a means to improve male genitourinary activity, the erectile function, to moderately increase testosterone levels, to maintain the immune system, to increase mental and physical activity; for patients with prostate adenoma, chronic congestive prostatitis, premature ejaculation, decreased quality of ejaculate, decreased libido.

Active ingredients: peptide complex AA-21 (peptide of men's reproductive system), L-arginine, brewer's yeast, enriched with selenium, piecemeal bark extract, zinc citrate, epimedium extract, hemolin, pantel.

Recommendations for use: men by one capsule 1-2 times per day during meals. Intake duration is 4-6 weeks. You can repeat the intake of the dietary supplement during the year, if necessary.

 30 capsules of 0.30 g

Supplements in the Prevention and Treatment of Diseases

Indosine®

cancer prevention

It is a highly effective preparation that reduces the risk cancer. It contains a complex of vitamins, coenzyme preparations, membrane stabilizers, immune modulators and antioxidants. The product restores the body's own anti-oxidant capacity, supports the immune system, normalizes the removal of toxins from the cell and restores tissue respiration, microcirculation processes and protects the body from the development of cancer. Its protective effect is due to the components it contains.

It is recommended in case of increased risk of cancer, presence of pre-tumour diseases, in the comprehensive treatment of oncopathologies, in case of recurring neoplasms, chemotherapy, antibiotic therapy, rehabilitation after surgical interventions and allergies.

Active ingredients: extract of milk-white iris, catalase, coenzyme Q10, superoxide dismutase, indole-3-carbinol, extract of broccoli.

Recommendations for use: one tablet 1 time a day during a meal. Tablets should not be crushed or crumbled before use. Intake duration is 4–6 weeks. You can repeat the intake of the dietary supplement during the year, if necessary.

30 tablets of 0.63 g

Complex 3R®

antioxidant protection

The product combines three most powerful antioxidants, membrane stabilizers and a geroprotectors. Helps deal with a variety of problems due to such powerful antioxidants as dihydroquercetin, resveratrol and Q10 coenzyme contained in it.

Recommended for patients with immune deficiencies of various genesis, frequent viral diseases, impaired lipid metabolism, as an antioxidant and as a means of cancer and cardiovascular disease prevention.

Active ingredients: dihydroquercetin, coenzyme Q10, resveratrol.

Recommendations for use: one tablet 1-2 times a day with meal. Duration of intake is 4-6 weeks. Repeated intakes are possible throughout the year.

30 tablets of 0.25 g

Chondromix®

chondroprotector

A complex preparation that improves cartilaginous tissue recovery. Prevents degenerative-dystrophic changes in joints and the spine, increases hyaluronic acid synthesis which is the main component of joint fluid that facilitates sliding of joints in the joint capsule; improves the quality of joint oil. Relieves pain and inflammatory processes in joints, prevents rigidity of joints.

Recommended for patients with osteoarthritis, arthritis, bursitis, rheumatism, spinal osteochondrosis, and gout.

Active ingredients: chondroitin sulfate, glucosamine, methylsulfonylmethane, grape seed extract, catalase, an extract boswellia, superoxide dismutase.

Recommendations for use: one tablet 2 times a day, with meal. Duration of intake is 4-6 weeks. Repeated intakes are possible throughout the year.

30 tablets of 0.41 g

Chondromix®

anti-inflammatory preparation and pain reliever
for joints and muscles

This cream-balm based on cartilage and vessel peptides softly eliminates the pain syndrome, improving local blood circulation, nutrition of joints and trophicity of periarticular tissues. Penetration of active components directly to inflamed areas removes spasms of paraarticular muscles that activate pain receptors. Due to its relaxing effect, the preparation restores blood circulation, releases hypostases, and restores joint mobility.

Recommended for patients with arthritis, arthroses, neuralgia, pain syndrome, inflammation and puffiness of joints and muscles, consequences of injuries.

Active ingredients: peptide complex AA-9, peptide complex AA-7, extract cowberry, extract boswellia, extract hot pepper, camphor, menthol, juniper essential oil, eucalyptus essential oil, rosemary essential oil.

Recommendations for use: apply on clean skin of problem areas 2-3 times a day by easy circular movements, massage until full absorption.

50 ml

Supplements in the Prevention and Treatment of Diseases

Amvix®

a source of instantaneous energy

The quick dissolving pills contain vitamins and amino acids that improve the work of the nervous system and metabolism. Product components stabilize blood pressure and sugar levels, help overcome fatigue, increase cerebral and physical activity and have an antitoxic effect.

The product is recommended in case of excessive physical and mental load, stressful situations, after disease recovery, during business trips and travels (especially when changing time zones), and when on a diet.

Active ingredients: roots eleuterkokka extract, vitamin C, taurine, beta-alanine, glutamic acid, carnitine, aspartic acid, arginine, vitamin A, C, E, B₆, B₉, PP.

Recommendations for use: dissolve one tablet in a glass of room temperature water and intensively stir within 1-2 minutes.

10 tablets of 2.5 g

Felicita®

natural antidepressant

It is a complex natural bioregulator that has a beneficial effect on the cardiovascular and nervous systems. Its action is caused by group B vitamins, folic acid and calcium pantothenate, which play an important role in maintaining the normal functioning of the nervous system. The product helps optimize the thinking processes and maintain energy exchange and vessel tonus. The preparation relieves strong psycho-emotional tension caused by frequent stressful situations.

It is recommended for patients with a strong psycho-emotional tension, neuroses, apathy, depression and chronic fatigue, and in case of increased physical and mental stress.

Active ingredients: magnesium carbonate, vitamins: C, B₁, B₆, B₁₂, PP, calcium Pantothenate, folic acid, Biotin, cloves, Basil, lecithin, cinnamon, tyrosine, arginine, phenylalanine, 5-HTP.

Recommendations for use: one tablet a day, with meal. Duration of intake is 4-6 weeks. You can repeat intakes if necessary. Repeated intakes are possible throughout the year (autumn and spring).

30 tablets of 0.71 g

Previn®

capillary protection

The product is based on hesperidin, nicotinamide and herbal components. It has antioxidant and angioprotective effects. It relieves spasm of small arterioles, improves microcirculation, strengthens capillary walls, restores the rheological properties of blood, and prevents thrombosis and the development of stroke and heart attack.

It is recommended as an extra source of hesperidin and nicotinamide. The preparation relieves spasm of small vascular vessels, normalizes the rheological properties of blood, prevents the development of atherosclerosis, stroke and heart attack, reduces blood cholesterol levels, strengthens the walls of blood vessels and restores capillary blood flow.

Active ingredients: L-arginine, hesperidin, choline bitartrate, green tea extract, niacinamide, vitamin PP.

Recommendations for use: one tablet a day with meal. Duration of intake is 4-6 weeks. Repeated intakes within a year are possible.

30 tablets of 0.5 g

Temero Genero®

neuroendocrine support

It is a complex of 2 products that boost the neuroendocrine and immune systems.

Temero is a modulator of the pineal gland and brain function that improves metabolism. It is intended for morning use as this is the time of pineal gland's physiological activity.

Genero is a modulator of the immune system and regenerative processes. It is intended for evening use.

It is recommended as a means to strengthen the immune system, for patients with neuroendocrine disorders, neuroses and depression. It improves general vigor and vitality, stimulates regeneration processes, helps alleviate sleep disorders, menopausal disorders. It can also be used as an integral part of an anti-alcohol and anti-drug addiction program, and as a means to extend active longevity.

Active ingredients Temero: glycine, glutamic acid, choline bitartrate, aspartic acid, calcium citrate, magnesium citrate, alanine, zinc citrate, 5-hydroxytryptophan, folic acid.

Active ingredients Genero: calcium citrate, magnesium citrate, glutamic acid, aspartic acid, proline, choline bitartrate, zinc citrate, lysine, folic acid.

Recommendations for use: one tablet of Temero before noon and one tablet Genero in the afternoon, with meal. Duration of intake is 4-6 weeks. Repeated intakes are possible if needed.

Temero: 30 tablets of 0.55 g; Genero: 30 tablets of 0.65 g

Supplements in the Prevention and Treatment of Diseases

Digemax®

digestive support

A highly effective preparation based on natural components that normalizes the digestive activity, coats the mucous membrane of the stomach, thus creating a barrier that protects it from harsh digestive juices and pathogenic flora. Stimulates growth and activity of useful intestinal microflora, improves vermiform movement, produces spasmolytic, anti-inflammatory, hepatoprotective and soft choleric effects.

Recommended for patients with peptic ulcer disease, acute and chronic gastritis, colitis, diarrhea, enteritis, heartburn and increased abdominal distension, bile congestion, and hyporexia.

Active ingredients: apple juice concentrate, lactulose, fructose, concentrate of chokeberry juice, marigold flower extract, licorice root extract, chamomile flower extract, extract of the herb St. John's wort, extract of aloe vera, marshmallow root extract, herbal extracts of peppermint, yarrow herb extract, fennel seed extract.

Retisil®

vision support

A multicomponent preparation that supports vision and maintains its optimal physiological state. Significantly improves retina blood supply and metabolism, relieves eye fatigue and improves vision, especially in the dark. Produces a general tonic effect.

Prevents metabolic disorders in the eye tissue caused by such systemic conditions as atherosclerosis, diabetes mellitus and autoimmune diseases.

Recommended as a means to improve metabolism in the eye tissue, to treat diabetic and atherosclerotic angiopathy of retina, and retina degeneration.

Active ingredients: concentrated juice of cranberries, concentrated blueberry juice, extract rose hips, blueberry fruit extract, grape seed extract, nettle extract, green tea extract, licorice extract, zinc lactate, extracts of lemongrass.

Canacor®

atherosclerosis prevention

A complex preparation that supports vascular activity and the heart. Improves myocardial tissue oxygenation and increases its resistance to ischemia. Reduces the frequency of arrhythmia attacks. Improves rheological properties of blood. Increases elasticity of arteries and capillaries. Reduces myocardial load. Relieves excessive tension and spasm of smooth muscle cells in arteries.

Recommended for patients with coronary heart disease, atherosclerosis, increased blood coagulability, pathological vessel fragility, arterial hypertension, myocarditis of various genesis, myocardiodystrophy, heart attack, and as a means of cerebral thrombosis prevention.

Active ingredients: apple juice concentrate, taurine, vitamin PP, arginine, hawthorn extract, dihydroquercetin, white willow bark extract, nettle extract.

Alvenorm forte®

bronchopulmonary support

It is a complex peptide and non-peptide bioregulator that boosts the respiratory system. The combination of active ultrashort peptides and a whole complex of medicinal phytoextracts provides the most effective result in the prevention and correction of bronchopulmonary diseases.

The effectiveness of the phytoconcentrate is due to the fact that absorption rate is increased, and the desired effect is achieved faster than with pills. It does not irritate the mucous membranes and has mucolytic, antiseptic, antispasmodic and immunoactive effects. It is recommended in cases of ARVI and ARD, acute and chronic bronchitis, chronic obstructive pulmonary disease, pneumonia and bronchial asthma as part of comprehensive therapy.

Active ingredients: peptide complex AA-14, peptide complex AA-15, peptide complex AA-3, concentrate of red grape juice, plantain extract, extract of marigold flowers, nettle extract, extract of cranberry leaf, root extract of licorice, extract of thyme, eucalyptus extract.

Pangluin®

diabetes relief

A natural highly effective preparation applied used to treat Types I and II of diabetes. Increases the performance and resistance of pancreatic β -cells.

Prevents vascular complications of various localization. Produces a moderate antihyperglycemic effect.

Recommended for patients with impaired lipid and carbohydrate metabolism, glucose intolerance, Types I and II diabetes, as a means of prevention of diabetic angiopathy, coagulation failure, capillary fragility.

Active ingredients: juice concentrate rosehip fructose, licorice root extract, extracts of Gotu Kola and wolfberry, rosehips extract, extract of the herb St. John's wort, extract of nettle leaf, extract calendula flowers, blueberry fruit extract, extract herb yarrow, extract raspberry leaf.

120 ml

Recommendations for use: one teaspoon (5ml) 2 times a day with meal. Duration of intake is 2-3 weeks. You can repeat intakes throughout the year 3-4 times.

Supplements in the Prevention and Treatment of Diseases

Rinolax®

cleansing and regenerating nose balms

In rhinitis, one of the first symptoms of a respiratory infection, the Rinolax nasal balm complex produced by the Peptides company can be of great help. They activate the regenerative processes, the local immunity, help relieve symptoms of congestion and dryness in the nasal passages and sinuses. To achieve a better effect, balms must be applied in two stages: first cleansing, then regeneration.

By washing your nose with the Cleansing Balm, you mechanically clean the mucous membrane of all impurities (including bacteria) and temporarily create an antiseptic environment. A regenerating balm should be applied at this time. It contains natural and vegetable essential oils that have a long-lasting bactericidal effect. The oil base allows the balm to remain on the mucous membrane of the nose for 2–3 hours and protect it from bacterial insemination.

The Cleansing Balm helps to normalize the microflora of the nasal mucosa, relieves swelling and dryness in the sinuses, and restores nasal breathing.

Recommended as a treatment against excessive dryness of the nasal mucosa, for people who work in dusty areas, against allergic rhinitis, for nasal hygiene, for the prevention of diseases of the upper respiratory airway.

Ingredients: aqua, panthenol, dead sea mineral salts, sodium hyaluronate, myristamidopropalkonium chloride.

The Regenerating Balm contains peptides of the B-component of the immune system and blood vessels. It has a powerful regenerating, anti-bacterial, anti-inflammatory and antiviral effect. Peptides activate local immunity and accelerate regeneration of the nasopharyngeal mucosa, which is important for atrophic conditions treatment.

The Regenerating Balm can be used to treat inflammatory diseases of the nose and nasopharynx, chronic atrophic rhinitis, sinusitis, for post-surgery rehabilitation after surgical interventions on the paranasal sinuses, against vasomotor rhinitis, for the prevention of bronchopulmonary pathology.

Active ingredients of the Cleansing Balm: aqua, Panthenol, Dead Sea Mineral Salts, Sodium hyaluronate, Myristamidopropalkonium Chloride.

Active ingredients of the Regenerating Balm: peptide complex AA-3, peptide complex AA-7, Prunus dulcis oil, Peach Kernel Oil, Mentha Piperita (Peppermint) Essential Oil, Eucalyptus essential oil, Kalanchoe pinnata leaf extract, Thymol, BHT, Citrus Reticulata Blanco (Tangerine) Essential Oil, Melaleuca alternifolia Essential Oil, Pinus sylvestris cone essential oil.

Recommendations for use: 5-6 sprays of the Cleansing Balm then 2-3 drops of the Regenerating Balm. Use 2-4 times a day, if necessary. Intake duration can be at least 10 days.

 50 ml // 10 ml

Pinalex®

eye tissue regeneration

A peptide bioregulator intended for eye tissue regeneration after diseases and injuries of the retina and cornea. Peptide complexes of the immune system (B-component), vascular wall and retina of the eye improve metabolism in eye tissues and trigger the recovery process at the cellular level.

The bioregulator contains panthenol that promotes active regeneration of damaged tissues and produces a moderate anti-inflammatory effect. It helps corneal tissue regenerate in case of erosion and inflammation.

Another important component of the preparation is low-molecular hyaluronic acid, which, when integrated into tissue cells, participates in their regeneration. Hyaluronic acid has also proved highly effective in ophthalmology, as it moistens the cornea and accelerates healing of damaged tissues.

Amber acid, another component of Pinalex® Balm, is obtained by processing natural amber. It improves body vitality and has a non-specific therapeutic effect on a number of complications of varying etiology. It has an anti-viral and antihypoxic effect. Laboratory research has proved that due to intake of amber acid, living cells can absorb oxygen more intensively. Even a body weakened by negative environmental factors increases its resources through the intake of amber acid: energy exchange is restored and the production of new cells is normalized.

Pinalex® is recommended for use as part of the comprehensive therapy of eye diseases, in visual stress, “dry eye” syndrome, in secondary degenerative processes in the retina against the background of injuries, glaucoma, angiopathies, dry form of maculodystrophy, and as a means of restoring eye functions after surgery.

In retinal vein thrombosis, atherosclerotic and diabetic angiopathies, Pinalex® improves the condition of blood vessels, metabolism of the pigment epithelium and cell oxygenation, accelerates the restoration of light sensitivity in the retina, and increases its resistance to hypoxia and ischemia.

Active ingredients: peptide complex AA-6, peptide complex AA-3, peptide complex AA-7, depantenol, hyaluronic acid, sorbic acid, succinic acid.

Recommendations for use: in the morning and in the evening for skin care around eyes. Apply small amount (3-6 drops) and distribute by easy patting movements on upper and lower lids. Let the balm be absorbed.

 10 ml

Reviform® Cocktail (Renewed)

slimming and weight loss drink

Following consumer demands and the latest trends in nutruciology, the Peptides laboratory specialists have updated both the packaging design and the formula of the product. It currently contains easily digestible proteins. In addition, we have reduced the content of soy proteins, so the preparation improves gastrointestinal activity. Coconut powder significantly improved product taste.

The Reviform® cocktail is distinguished by its balance of proteins, a rich content of vitamins and minerals that make up the drink, making it an irreplaceable assistant in the struggle for an ideal figure. It saturates the body with the necessary energy, and produces a rejuvenating and antioxidant effect.

The high content of fiber, enzymes, and natural extracts helps reduce weight safely, and produces a strong strengthening effect on the entire body. When used regularly, it improves stool consistency, restores the mucous membrane of the gastrointestinal tract, improves the secretion of iron, and reduces gastric juice acidity.

The Reviform® cocktail helps fight chronic fatigue, stress and irritability, stimulates metabolic processes, and helps prevent cardiovascular diseases. The cocktail will become an essential help during travel or business trips when there is no access to home-made food, and you have to rely on the integrity of the catering staff. It is a complete substitution for one meal a day and an excellent alternative to unhealthy snacks that have a negative impact on your body.

It is recommended as a means of weight correction, improving the work of the excretory system, stimulating metabolic processes in the body and burning fatty tissue, preventing obesity and cardiovascular diseases.

Main components: soy protein isolate, whey protein concentrate, non-fat dry milk powder, soluble dietary fiber (gum-arabic), coconut cream powder, vitamin premix (containing vitamins C, B₁, B₆, B₁₂, PP, folic acid, calcium pantothenate, biotin), mineral premix (containing iron, iodine, manganese, copper, selenium, zinc).

Recommendations for use: fill glass with 2 tablespoons (25 g) of beverage powder and add a little amount of liquid (boiled water or milk at room temperature), stir well until the appearance of crema and smooth texture. After that, the rest of liquid should be added (200–250 ml per 25 g of beverage powder). Product should be done instantly before the using.

 375 g

Reviform® oil coupage

a source of unsaturated fatty acids: omega-3, omega-6, omega-9

This blend of vegetable oils, rich in a variety of unsaturated fatty acids, macro - and micronutrient elements, is considered a perfect product for a rich and balanced diet. Vegetable fats contain a complex of A, E, C, D, and K vitamins and are necessary for the normal functioning of many biochemical processes in the human body. It is recommended for high-quality balanced nutrition, improvement of the overall tone of the body, prevention of gastrointestinal, liver and biliary tract diseases.

Main components: oil of sunflower seed refined, cold pressed olive oil, camelina oil unrefined, cold pressed linseed oil, oil of thistle seed cold pressed, unrefined sesame seed oil, grapeseed oil.

Recommendations for use: as additive to cold and hot dishes for giving a pleasant taste and aroma, and enrichment by their valuable nonsaturated fatty acids.

 170 ml

Reviform® soup

low-calorie cream soups

The soups are based on natural animal proteins and contain sublimated peptides, greens and spices. Meat peptides have an optimal amino-acid structure and are enriched with the minerals necessary for the body: calcium, magnesium, potassium, selenium, iron, etc.

Our cream-soups do not contain GM ingredients, artificial food colorants and fragrances.

Reviform cream-soups are a perfect opportunity to control your weight and quickly perfect your shape without exhausting diets and infinite restrictions.

Recommended as a means of optimization of dietary intake, stimulation of lipolysis and general metabolism, digestive tract activity improvement, and weight loss.

5 sachets of 20 g: chicken with vegetables, with beef and vegetables, chicken with ginger, tomato with beef, cheese.

Recommendations for use: pour out bag content in a plate or in a big cup, add 200 ml of hot boiled water, mix carefully and allow to infuse within 5-7 minutes.

 120 ml

Mesotel for Internal Use

Mesotels for Internal Use

natural antioxidant anti-age products

Mesotels for internal use are basic means of revitalization. They are currently represented by four generations: Mesotel based on choline, gotu kola and lycium, Mesotel Beauty enriched with zinc and selenium, resveratrol-based MesotelNeo (a natural phytoalexin), and Mesotel Tabs that contains resvera-

trol, glycine and vitamin B₆. Use of mesotels considerably improves brain blood circulation, nervous system activity, accelerates metabolic processes. All the components are selected in such a way and in such proportions that they modulate and enhance each other's effect.

 120 ml

Recommendation for use: by one teaspoon 1-2 times a day with meal. Duration of intake is 1 month. Repeated intakes are possible throughout the year.

 30 tablets of 0,6 g

Recommendation for use: one tablet once a day with meal before noon. Duration of intake is 4-6 weeks. Repeated intakes are possible throughout the year.

Mesotel

choline-based product

Mesotel is recommended for cerebral circulation improvement and patient rehabilitation after stroke, improvement of CNS function, neuromuscular conductivity, antioxidant protection of the body, improving immunity and general rejuvenation of the body.

Active ingredients:

extracts of Gotu Kola and wolfberry.

Mesotel Beauty

with zinc and vitamins

Mesotel is recommended for the improvement of cerebral circulation and CNS functioning, rehabilitation after stroke, cancer prevention, antioxidant protection of the body, immunity improvement, and for the prevention of aging.

Active ingredients:

extracts of Gotu Kola and wolfberry, zinc lactate, sodium selenite.

Mesotel Neo

product with resveratrol

Mesotel is recommended for cerebral circulation improvement, atherosclerosis prevention, normalization of lipid metabolism, improvement of neuromuscular conductivity and CNS function, prevention of cancer, rehabilitation after heart attack and stroke, improvement of immunity, antioxidant protection of the body, and the prevention of aging.

Active ingredients:

choline bitartrate, extracts of Gotu Kola and wolfberry, zinc lactate, sodium selenite, resveratrol.

Mesotel Tabs

with resveratrol, glycine, vitamin B₆

Mesotel is recommended for antioxidant and anti-stress protection of the body, cerebral circulation improvement, the enhancement of CNS functioning and mental performance improvement, restoration of deteriorated memory and concentration, normalization of metabolic processes in the body, slowing down of the aging process at the cellular level.

Active ingredients:

glycine, choline bitartrate, green tea extract, resveratrol.

Advanced Technologies to Combat the Disease of the XXI Century

The increasing cancer incidence rate means that it is necessary to search for new effective methods of prevention, as well as new methods to help cancer patients.

To date, we have developed and put into practice five products:

Ensil, the basic oncology protector, used in the presence of diseases that increase the risk of cancer development;

Revifort, a broad-spectrum anti-cancer protection agent, can be used both in the presence of background diseases and for patients who already have cancer; the product enhances the efficiency of the main treatment methods and improves its long-term results in cancer patients;

Reviplant is a chemo- and radioprotector, an integrated product that supports the functions of the main organs and systems during chemotherapy and radiation therapy and also has antitumor effect;

Levain is immunomodulator, which multiplies the effect of anticancer drugs, destroys the structure of cancer cells, significantly enhancing the outcome of the treatment;

Likam is a detoxication product, designed to prevent and reduce side effects of chemotherapy.

Ensil®

A basic oncoprotector

It improves tissue respiration and regeneration. It has established itself as a powerful tool in cancer prevention, which has been repeatedly confirmed clinically.

It is recommended for the treatment of immunodeficiency of various origins, for cancer prevention, rehabilitation after severe injuries and previous diseases, after heart attack and stroke, for administration in the pre- and post-surgery period, degenerative diseases of the joints and spine, chronic respiratory diseases, diseases of the gastrointestinal tract and urinary tract, hypovitaminosis, metabolic disorders and problems related to redox processes, for people engaged in increased physical activity, to prevent premature aging

Active ingredients: L-carnitine, L-cysteine, succinic acid, echinacea extract, vitamins A, B₁, B₂, B₅, B₆, B₇, B₁₂, C, D₃, E, PP, folic acid, biotin, coenzyme Q10.

Recommendations for use: one capsule 3 times a day, with meal. Duration of intake is one month.

 90 capsules of 0.31 g

Revifort®

A protective agent for a broad range of oncological diseases

It combines the achievements of oriental and classical medicine. For the first time, fungai like shiitake, reishi, maitake and cordyceps have been combined, being almost the only natural sources of glucans group substances, which cause the immune system to destroy tumor cells in an active and multiphase manner even in the tumor nidus.

It is recommended for oncopathology prevention; in the complex treatment of cancer patients with different localization and in different stages of the process, in immunodeficiency, systemic lupus erythematosus, scleroderma, rheumatism, combined cardiovascular disease, multiple sclerosis, chronic hepatitis, diabetes, prevention of premature aging, and in metabolic disorders.

Active ingredients: extract of shiitake mushrooms, extract Reishi mushroom, extract maitake mushroom, extract cordyceps mushroom, extract Echinacea purpurea, zinc citrate, an extract of thalli laminaria, selenium sodium.

Recommendations for use: one capsule 2 times a day, with meal. Duration of intake is 1 month. Interval between intakes not less than 10 days.

 60 capsules of 0.31 g

Reviplant®

A new generation chemo- and radioprotector

It is intended to reduce the damaging effects of toxic anticancer therapy on healthy organs and tissues (chemotherapy, radiation therapy).

The product makes it possible to administer a full course of toxic therapy without interruption which is sometimes caused by side effects of such treatment. It includes an advanced complex of amino acids and plant extracts.

It is recommended for the prevention and treatment of secondary immune deficiency conditions caused by radiation and chemical factors, to improve the body's resistance to intoxication, infections, radiation, to normalize metabolic processes, reduce pain, improve the effectiveness of treatment and enhance the wellbeing of cancer patients.

Active ingredients: valine, arginine, taurine, artichoke extract, leucine, isoleucine; burdock extract, an extract of Rhaponticum, fungus extract, artichoke extract, rosehip extract.

Recommendations for use: 1 teaspoon 2 times a day with meal. Duration of intake is 20 days.

 200 ml

Levain®

Immunomodulatory and antistress effect

This immunomodulator with antistress action is used in autoimmune diseases to improve the function of the CNS, the circulatory system, reduce the risk of lymphatic system disorders.

In cancer, as a part of complex therapy, it reduces the risk of metastases development in the lymph nodes and limits tumor growth.

It is recommended for cancer treatment as a part of complex therapy, in reduced immunity, to improve blood circulation and lipid metabolism, to improve tone and well-being.

Active ingredients: extract eleutherococcus senticosus, extract liquorice, extract schisandra chinensis, extract rhaponticum carthamoides, extract chamemion angustifolium, extract plantago major, extract hypericum perforatum, extract amaranthus, extract rhodiola rosea.

Recommendations for use: one tablet a day with meal. Duration of intake is 1 month. You may repeat intake if needed. Repeated intakes throughout the year are possible.

 30 tablets of 0.3 g

Likam®

Detoxification

This integrated product has immune restoration and general tonic effect on the entire body. In cancer, it prevents and reduces the negative effects of chemotherapy and the side effects of toxic substances present in the most effective anti-cancer drugs.

It is recommended as a part of complex anticancer therapy, in pain syndrome, for vascular wall reinforcement and against various types of intoxication: in toxic vascular lesions, alcoholic and chronic drug intoxication, long-term antibiotic therapy.

Active ingredients: natural pine complex, lycopene, astragalus root extract, resveratrol, amino acids: L-arginine, L-glycine, L-glutamic acid, L-aspartic acid, alanine, 5-hydroxytryptophan.

Recommendations for use: one tablet a day with meal. Duration of intake is 1 month. You may repeat intake if needed. Repeated intakes throughout the year are possible.

 30 tablets of 0.5 g

Ayurveda Herbal Teas

Time-tested tea drinks

A herbal tea is an infusion or decoction of fruits, flowers, stems or roots of various medicinal plants, which has a beneficial effect on specific systems of the body, depending on the combination of components in the resulting drink. Its composition, in addition to vitamins and minerals, includes amino acids, essential oils, tannin and many other beneficial ingredients. Regular intake of herbal teas, which should be limited by a specific quantity not to exceed the daily needs of the body in nutrients, is able to normalize metabolic processes and improve immunity.

Especially for you, we have created Ayurveda, a whole line of herbal teas based on Ayurvedic and traditional herbs and spices. Each of the formulas

presented here is based on the principle of bringing processes into balance. In our Ayurveda line, we have tried to replace, wherever possible, Ayurvedic herbs and spices from oriental recipes with the traditional local ingredients, similar in spirit, energy and minor nutrient element composition. However, oriental medicine uses a number of plants, unique in their nature and properties, which have no alternative in classical medicine. They represent a range of basic tea which trigger self-regulation and detoxification of the body, reinforce immunity and slow down the aging process. You are welcome to collect your own palette of tea flavors from Ayurveda series and discover their natural power.

Recommendations for use:

use according to the recommendations set out in the Practical Guide to Combining Products of the Peptides Company.

ANTI-AGE COMPLEX NB

CODE OF YOUTH

At the intersection of art and technology, on the verge of dreams and reality, with a combination of skill and talent, an incredible Anti-age trio was created to combat aging:
Health – Beauty – Activity

Health. Multifunctional Age-Protector is aimed at slowing the aging process, preventing age-related changes, antistress and antioxidant protection of the body, as well as maintaining a normal level of metabolic processes. Powerful peptide substances in combination with naturally occurring antioxidants literally rejuvenate the neuro-endocrine, immune and reproductive systems; effectively cope with fatigue, stress, insomnia and premature age changes.

Active ingredients: Peptide complexes: AA-1, AA-3, glutamic acid, aspartic acid, astragalus extract, 5-hydroxytryptophan (griffonium extract), folic acid (vitamin B₉).

Recommendations for use: adults use 1 capsule per day during meals. Duration of use – 4–6 weeks. If necessary, you can repeat the use. Repeated use is possible throughout the year.

Form: 30 capsules.

Beauty. Antiglycating face serum against wrinkles is the activator of the code of youth and the embodiment of the dream of perfect beauty without wrinkles. The combination of professional peptides and highly active biotech complexes is a real breakthrough in the field of revitalizers and anti-age cosmetology. The main tasks of the serum are: remodeling of all skin structures, fighting with glycation – which is the main enemy of collagen and a quick lifting effect.

Active ingredients: Matrixyl® synthe6™, albicides bark extract (Prodzia™), extract of the emperor cylindrical (Moist-24™), rosemary extract, sage extract, fern leaf extract Cyathea cumingii, (Liftessense™), Syn@-Ake, red extract clover, lecithin (Sterocare™), liposomes with vitamin C, Jerusalem artichoke extract.

Recommendations for use: depending on the need, use serum 1–2 times a day. To achieve maximum effect, use serum regularly at least 28–30 days 3–4 times a year.

Form: cosmetic syringe, 15 ml.

Activity. Drink concentrate replenishing the body energy is a superprofessional in fighting against aging: it protects the body from glycation and free radicals, improves metabolism, memory, efficiency and concentration; helps cope with mental and physical fatigue, insomnia, strengthens the joints, improves skin appearance struggling with wrinkles and other imperfections.

Active ingredients: peptide complexes AA-3, AA-9, rosemary extract, hematococcus extract (astaxanthin), barley extract (contains superoxide dismutase), ginseng root extract, sodium-alpha lipoic acid.

Recommendations for use: 25 drops of drink concentrate dissolve in 100 ml of water at a room temperature. It is recommended to use the product in the first half of day.

Form: bottle, 50 ml.
