PEPTIDY

Integrovaný prístup k zachovaniu mladosti a krásy

Veda a technológie proti starnutiu sa neustále vyvíjajú. Špecialisti našej spoločnosti pokračujú v štúdiu vlastností bylinných zložiek a peptidov s cieľom vylepšiť zloženie kozmetiky. V súčasnosti sa očakáva, že kozmetika proti starnutiu komplexne vyrieši problémy spôsobené starnutím: je potrebné bojovať proti oxidácii, deštrukcii buniek, degradácii bielkovín a glykácii. Kozmetológovia sú si istí, že zmeny pleti súvisiace s vekom sa začnú objavovať dávno predtým, ako ich následky uvidíte v zrkadle.
Do hry vstupujú vnútorné aj vonkajšie faktory, ktoré zanechávajú nezmazateľnú stopu nášho vzhľadu.

Preto je dôležité venovať osobitnú pozornosť starostlivosti o pokožku, pretože je oveľa jednoduchšie zabrániť zmenám súvisiacim s vekom skôr, ako sa prejavia vo forme vrások a matnej pleti.

Peptidová kozmetika je sľubným trendom v kozmeteológii. Peptidy unikajú do hlbokých vrstiev kože a ovplyvňujú procesy prebiehajúce v bunkách. Zvyšujú lokálnu imunitu, a tým vytvárajú bariéru, ktorá chráni vašu pokožku pred škodlivými účinkami UV žiarenia, voľných radikálov, agresívnymi vplyvmi prostredia a stresom.

Peptidy v kozmetike teda zabraňujú vzniku známok starnutia. Nepochybnou výhodou je, že sú úplne bezpečné a nemajú žiadne vedľajšie účinky. Špecialisti laboratória Peptides vytvorili program starostlivosti, ktorý vám umožní vyzerať perfektne 24/7 v každom veku.

Skúsenosti vedcov dokazujú, že je možné zabrániť predčasným zmenám súvisiacim s vekom! Preventívne opatrenia by sa mali prijať vo veku 25 - 30 rokov. Zakaždým, keď svoju pokožku nasýtite nevyhnutnými zložkami, zachovávate tak mladosť.

REVILINE® PRO

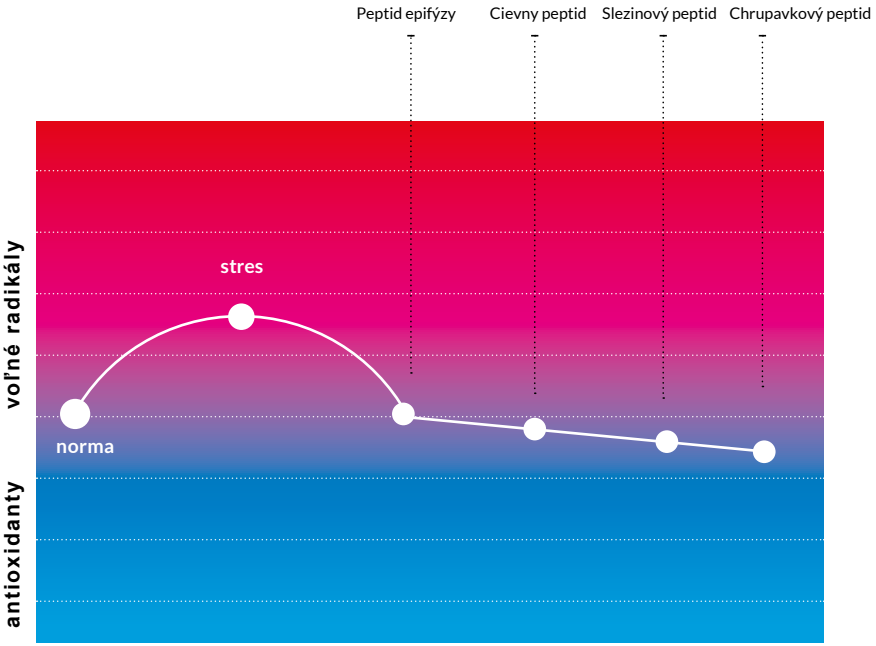

SÉRIA VÝŽIVOVÝCH KRÉMOV NA STAROSTLIVOSŤ O PLEŤ S KRÁTKYMI PEPTIDAMI

REVILINE PRO je séria krémov na starostlivosť o pleť s krátkymi peptidmi, ktoré pôsobia ako spúšťač mechanizmov omladenia buniek. Jedinečná kombinácia vysoko zameraných peptidových látok, účinných rastlinných extraktov a prírodných olejov vám umožňuje odolávať starnutiu pokožky a deštruktívnemu pôsobeniu agresívnych faktorov.

Krátke peptidy epifýzy, imunitného systému, kostného chrupavkového tkaniva a steny ciev, ktoré sú súčasťou krémov REVILINE PRO, sú schopné zasahovať do metabolizmu kožných buniek a udržiavať ich na optimálnej úrovni.

Rastlinné extrakty vytvárajú intenzívny a jemný účinok. Vyživujú a hydratujú vašu pokožku, stimulujú metabolické procesy a posilňujú jej povrch. Prírodné oleje a extrakty sú cenným zdrojom prírodných biologicky aktívnych látok, vitamínov a polynenasýtených kyselín, ktoré pomáhajú spomaliť proces starnutia.

Vďaka pravidelnému používaniu profesionálnych krémov REVILINE PRO sa vaša pokožka zo dňa na deň premení, naplní sa vlhkosťou a sviežosťou, stane sa žiarivou a opäť vyzerá mladistvo.

Séria
REVILINE **PRO**

revitalizácia

REVILINE® PRO

REVILINE® PRO revitalizačný krém vám pomôže vyriešiť problém sucha a odlupovania. Účinné je aj to, ak vaša pokožka stratila prirodzený jas.

Tento krém reguluje syntézu melatonínu v kožných bunkách a funguje tiež ako antioxidant. Peptidy epifýzy regulujú metabolické procesy a zvyšujú syntézu bielkovín, normalizujú procesy peroxidácie lipidov v bunkách a eliminujú negatívne účinky vonkajších a vnútorných nepriaznivých faktorov na vašu pokožku.

Obsahuje: **peptidový komplex AA-1 (krátke peptidy epifýzy),** ovocný olej Olea Europaea, olej zo semien Simmondsia Chinensis, extrakt z Chamomilla Recutita, extrakt z koreňa glycyrrhiza glabra, olej z elaeis guineensis, lipozomálny vitamín C, extrakt zo semien Punica Granatum, zingiber offina .

regenerácia

REVILINE® PRO

Regeneračný krém REVILINE® PRO je účinný, ak je vaša pokožka matná a je náchylná na zápaly a akné.

Aktivuje procesy regenerácie kožných buniek, zlepšuje bunkový metabolizmus. Peptidy sleziny (B-väzba imunitného systému) stimulujú regeneráciu tkanív, syntézu tkanivovo špecifických proteínov, proliferačnú a metabolickú aktivitu buniek a urýchľujú ich obnovu. Vďaka tomu sa posilní kolagénová štruktúra vašej pokožky a zvýši sa jej pružnosť. Tento krém má tiež protizápalové a antioxidačné účinky.

Obsahuje: **peptidový komplex AA-3 (krátke peptidy B-imunitného systému),** ovocný olej Olea Europaea, bioflavolipidový komplexný aktivitín (extrakt zo šalvie lekárskej, extrakt z Chamomilla Recutita, extrakt z Hypericum Perforatum, extrakt z nechtíka lekárskeho), extrakt z kôry Quercus Robur, potentilla erect Koreňový extrakt, koreňový extrakt z Glycyrrhiza Glabra, olej z Elaeis Guineensis, extrakt zo semien granatum.

spevnenie

REVILINE® PRO

Spevňujúci krém REVILINE® PRO je účinný, ak je vaša pokožka stenčená a ochabnutá.

Tento krém obnovuje kolagénovú štruktúru elastických vlákien vašej pokožky. Peptidy z chrupavkového tkaniva regulujú metabolické procesy v spojivovom tkanive, stimulujú regeneráciu fibroblastov a keratinocytov, zabraňujú deštruktívnym zmenám v štruktúre kolagénu vašej pokožky, podporujú účinné napínanie pokožky a aktivujú syntézu bielkovín v bunkách.

Obsahuje: **peptidový komplex AA-9 (krátke peptidy z chrupavkového tkaniva),** kakaové maslo Theobroma, extrakt z kôry Quercus Robur, koreňový extrakt Potentilla Erecta, koreňový extrakt z glycyrrhizy Glabra, lipozomálny vitamín C, semenný olej Linum Usitatissimum, extrakt zo semien Punica Granatum Extrakt hippocastanu, koreňový extrakt Zingiber Officinale.

intensive

REVILINE® PRO

Intenzívny krém REVILINE® PRO je účinný v prípade viditeľných kozmetických defektov spôsobených dilatáciou a krehkosťou malých ciev (vaskulárna sieťka a hviezdy na jablkách líc a krídel nosa).

Posilňuje a reguluje priepustnosť cievnych stien vašej pokožky. Tento krém tiež zvyšuje napnutie pokožky. Cievne peptidy regulujú metabolické procesy v stene cievy, normalizujú cievny tonus, zabraňujú rozvoju hyperkoagulácie a obnovujú narušenú mikrocirkuláciu v orgánoch a tkanivách pod vplyvom nepriaznivých faktorov prostredia a emočného stresu.

Obsahuje: **peptidový komplex AA-7 (krátke peptidy cievnej steny),** hydrogenovaný kokosový olej, ovocný olej z Europaea, olej zo semien Vitis Vinifera, extrakt z Chamomilla Recutita, olej z klíčkov Triticum Vulgare, extrakt z nechtíka lekárskeho, Extrakt z kôry Quercus Robur, koreň Potentilla Erecta Extrakt, extrakt z koreňa Glycyrrhiza Glabra, olej zo semien Ricinus communis, extrakt zo semien Punica Granatum, extrakt z Aesculus Hippocastanum.

REVILINE®

SÉRIA KOZMETIKY S PRÍRODNÝMI PEPTIDAMI

Séria REVILINE sebavedome zaujíma popredné miesto medzi výrobkami starostlivosti o pleť s výrazným anti-age efektom.

Zvláštnosť línie REVILINE je určená skupinou prírodných peptidových komplexov zahrnutých v kompozícii pre rôzne aplikácie. Vďaka prírodným peptidom sa metabolizmus v kožných bunkách obnovuje a udržuje na optimálnej fyziologickej úrovni, zlepšuje sa jeho textúra, farba a hydratácia a dosahuje sa zdvíhací účinok.
Prírodné peptidy ľahko unikajú do hlbokých vrstiev kože, pretože ich mole-kulová hmotnosť je oveľa nižšia ako molekulová hmotnosť bielkovín. Infiltrácia peptidov sa ďalej zlepšuje ich lipofilizáciou, to znamená kombináciou s tukovou bázou, ktorá je prítomná vo všetkých krémoch.

Séria bunkovej kozmetiky REVILINE obsahuje aj najsilnejšie antioxidačné komplexy superoxiddismutázy (SOD) a jej induktorov. Tieto komplexy majú antioxidačné, imunomodulačné, UV-ochranné, protiradiačné a protinádorové účinky, výrazne urýchľujúce procesy detoxikácie a regenerácie kožných buniek.

Okrem toho medzi dva pleťové krémy Reviline 04 na problémovú pokožku a Reviline 07 Clean Skin proti „sieťkam“ a „hviezdam“ pleti patrí Betulavit, ktorý je založený na extrakte z brezovej kôry, triterpenoidu. Pri štúdiu tejto látky sa preukázalo, že betulín má antibakteriálne, protizápalové a zvlhčovacie vlastnosti.

Kozmetika REVILINE vzniká na križovatke kozmetológie a farmakológie a kombinuje vlastnosti inovatívnych produktov proti starnutiu a hojenia. Odporúča sa používať od 25 do 30 rokov.

Odporúčania na použitie

Existuje 7 pleťových krémov - od RN 01 do RN 07 a 5 telových krémov - od RN 08 do RN 12.

RN 02 and 03 creams, day and night, provide basic skin care. The peptide complex of the thymus, which is part of their composition, helps to increase local immunity, skin regeneration, and improves metabolic processes.

Creams RN 05 and RN 06 are meant for the skin around the eyes. They are enriched with the bioantioxidant complex «Neovitin» ® based on ginseng. It smoothes out wrinkles and prevents the appearance of new ones, nourishes the skin and prevents it from dehydration, increases its firmness and elasticity; stimulates intense collagen production, etc.

One of the trends in modern cosmetology is to use different products for different parts of the face. For example, matting and drying creams can be applied to areas of increased activity of the sebaceous glands (**RN 04** is suitable for problem skin). For cheek and forehead areas, creams with a prominent softening and moisturizing effect can be used, e.g. **day RN 02** or **anti-wrinkle cream RN 01**.

Body creams from the Reviline series help fight the most common problems. You will find remedy for stretch marks and scars (**RN 08**), cellulite (**RN 09**), and varicose veins (**RN 11**). The RN 08 cream called «Smooth Skin» should be applied to cleansed body skin and rubbed in with massaging movements until completely absorbed. Apply **anti-cellulite cream RN 09** to problem areas with vigorous massaging movements.

Anti-aging cream RN 11 is intended for your feet. Use it every day. This cream contains peptide complexes of blood vessels and cartilage tissue, as well as horse chestnut extract, which is effective against varicose veins due to two substances: esculin and escin. These components lower blood viscosity, strengthen the walls of blood vessels, prevent blood clots and improve blood flow. Chestnut helps to improve metabolism. It also removes excess fluid and has an anti-inflammatory, analgesic, and capillary-strengthening effect.

Nourishing cream RN 10 provides hand skin care. It contains peptide complexes of blood vessels, cartilage tissue and thymus, «Neovitin» ® complex and vitamins A and E. Cream RN 10 moisturizes the skin of the hands, protects it from cold and insolation, and stimulates cell regeneration processes. During the day, when necessary, apply the cream to clean hands and massage it until completely absorbed.

To fight corns and cracks on the feet, use the **RN 12 cream.** One of its main components is the bioflavolipid complex Activitin®, consisting of extracts of medicinal plants: sage, chamomile, calendula and St. John's Wort. Thanks to Activitin® and peptide complexes of blood vessels, cartilage and thymus, the cream has unique healing properties, reducing inflammation and providing nutrition, hydration, antimicrobial and antioxidant protection of the skin

REVILINE	SPHERE OF ACTION	DESCRIPTION OF THE ACTION	ACTIVE INGREDIENTS
RN 01	Anti-wrinkle face, 30 ml	· Provides lifting effect · reduces the number of wrinkles and their depth · improves skin texture and complection · effectively moisturizes the skin · improves microcirculation and metabolic processes · reduces puffiness	Peptide complex A-4 (cartilage), caprylic/capric triglyceride, olea europaea fruit oil, simmondsia chinensis seed oil, bioantioxidant complex Neovitin®, Hydromoist Plus, bisabolol, silver citrate, prunus amygdalus dulcis seed extract
RN 02	Anti-aging face day cream 50 ml	· Restores skin elasticity and turgor · smoothes fine lines · prevents age-related skin changes · improves complexion	Peptide complex A-6 (thymus), olea europaea fruit oil, glycine soja oil, bioantioxidant complex Neovitin®, silver citrate, glycerin, theobroma cacao seed butter, hydrolyzed collagen, panthenol
RN 03	Night face cream 50 ml	· Reduces the number of wrinkles and their depth · improves skin elasticity · improves microcirculation and metabolic processes in the · skin cells · removes toxins	Peptide complex A-6 (thymus), bioflavolipid complex Activitin® (salvia officinalis extract, chamomilla recutita extract, hypericum perforatum extract, calendula officinalis extract), glycerin, olea europaea fruit oil, hydrogenated castor oil, hydrolyzed collagen
RN 04	Face cream for problem skin 30 ml	· Prevents acne · normalizes skin oiliness · controls the moisture balance of the skin · improves microcirculation and trophism	Peptide complex A-6 (thymus), betula alba bark extract (Betulavit®), bioflavolipid complex Activitin® (salvia officinalis extract, chamomilla recutita extract, hypericum perforatum extract, calendula officinalis extract), silver citrate
RN 05	Intensive eye cream 30 ml	· Smoothes out fine wrinkles in the corners of the eyes · lifting effect · improves trophism of skin around the eyes · moisturizes skin · improves skin texture	Peptide complex A-3 (vessels), A-4 (cartilage), A-6 (thymus), olea europaea fruit oil, ethylhexyl cocoate, sorbitol, bioantioxidant complex Neovitin®, dimethicone, euphrasia officinalis extract, helianthus tuberosus extract, silver citrate
RN 06	Eye cream-gel for puffiness and dark circles 30 ml	· Evens out skin color around the eyes · lifting effect · improves trophism of skin around the eyes · smoothes out fine wrinkles in the corners of the eyes · improves skin texture and moisturises skin	Peptide complex A-1 (pancreas), A-3 (vessels), A-4 (cartilage), A-6 (thymus), glycerin, bioantioxidant complex Neovitin®, vitis vinifera seed oil, butyrospermum parkii butter, olea europaea fruit oil, sponge extract, hamamelis virginiana bark/leaf/twig extract saccharomyces cerevisiae extract

REVILINE	SPHERE OF ACTION	DESCRIPTION OF THE ACTION	ACTIVE INGREDIENTS
RN 07	Cream for broken capillaries and spider veins 30 ml	· Makes vascular spiders less conspicious · moisturizes, nourishes and tones the skin · improves skin texture · contributes to blood circulation normalization · protects against aggressive environmental exposure	Peptide complex A-3 (vessels), glycyrrhiza glabra root extract, betula alba bark extract (Betulavit®), ethylhexyl cocoate, hamamelis virginiana bark/ leaf/ twig extract/, vitis vinifera seed oil
RN 08	Body cream for stretch marks and scars 50 ml	· Makes stretch marks and scars less conspicuous · improves skin texture and blood circulation · moisturizes, nourishes and tones the skin · promotes fat burning	Peptide complex A-4 (cartilage), olea europaea fruit oil, bioantioxidant complex Neovitin®, sorbitol, glycine soja oil, glycerin, hydrolyzed cucurbita pepo seedcake
RN 09	Anti-cellulite body cream 50 ml	· Fights against cellulite · improves skin tone and elasticity · helps eliminate toxins and burn body fat · improves microcirculation and trophism of the skin	Peptide complex A-7 (liver), olea europaea fruit oil, bioantioxidant complex Neovitin®, glycine soja oil, glycerin, capsicum annuum extract, caffeine, theobroma cacao seed butter, fucus vesiculosus extract, silver citrate
RN 10	Nourishing hand cream 50 ml	· Effectively moisturizes the skin · improves skin texture · increases the resistance of the skin · (hands) to insolation and cold	Peptide complexes A-3 (vessels), A-4 (cartilage), A-6 (thymus); glycerol, bioantioxidant complex Neovitin®, hydrogenated castor oil, oil shea, panthenol, vitamins A and E, silver citrate
RN 11	Rejuvenating leg cream 50 ml	· Reduces heaviness, swelling and pain in the legs · improves microcirculation and metabolic processes in the skin	Peptide complex A-3 (vessels), A-4 (cartilage), castor oil, bioantioxidant complex Neovitin®, hamamelis virginiana bark/leaf/twig extract, hippocastanum extract, silver citrate, menthol
RN 12	Restoring foot cream for cracks and corns 50 ml	· Softens dry, rough skin of heels and feet · accelerates cracks healing · prevents corns formation · stimulates skin cells regeneration · improves microcirculation and trophism of the skin · restores elasticity and softness of the skin of the legs	Peptide complex A-3 (vessels), A-4 (cartilage), A-6 (thymus), theobroma cacao seed butter, olea europaea fruit oil, glycerin, bioflavolipid complex Activitin®, centella asiatica extract, aloe barbadensis leaf juice, allantoin, silver citrate

RECOMMENDATIONS FOR USING REVILINE TONICS

The use of a tonic has long been an integral part of daily facial care. Its main task is to tone the skin. But besides this, it performs a number of other very important functions: it completes the cleansing process, restores the pH balance, and prepares the skin for the application of serum or cream (due to the toner, the components of whey or cream will work more effectively). If you have a dull complexion, flaking or enlarged pores, include a toner in your daily skincare ritual. It will minimize your problems. Use it regularly for at least a month to see significant results.

There are two types of tonics in the Reviline series: Micellar Cleansing and restoring pH balance. Both are suitable for all skin types.

Micellar Tonic can be used instead of the usual milk for removing makeup. It literally draws out impurities from pores and removes makeup perfectly. Do not forget to wash off the rest of the tonic with water.

The pH Balance Tonic has a light refreshing effect and gives you a pleasant sensation. Use it after cleansing your skin. Apply morning and evening to clean, dry skin with a cotton pad along the massage lines.

PH-BALANCE TONIC

The pH Balance Tonic restores the acid-base balance of the facial skin due to its Rubixyl ® peptide, which can be called an assistant in the fight against everyday stress. With regular use, the skin's resistance to various stressful influences significantly increases, wrinkles are smoothed and the complexion improves.

Contains: Rybixyl®, fireweed canadian extract, euphrasia officinalis extract (and) melissa officinalis leaf extract (and) magnolia biondii but/flower extract (and) lecithin, pantenol.

110 ml

CLEANSING MICELLAR TONIC

This product is designed for delicate and effective removal of decorative cosmetics and various impurities that inevitably settle on your skin surface during the day, waste products of epidermal cells and sebaceous glands from your face and the area around the eyes. Cleansing prepares the skin for further care procedures, and the effectiveness of other cosmetics products depends on its quality. The combination of caring and moisturizing ingredients with mild surfactants in the toner provides maximum and gentle cleansing.

Contains: hydrolat witch hazel, isopropandiol, hydroxyethyl urea, betaine, coffee green extract, panthenol, hydrogenated castor oil.

RECOMMENDATIONS FOR USING REVILINE PETALS

Petals are patches for delicate skin around the eyes from the Reviline series that will help you out if you need to quickly and efficiently remove signs of fatigue from around the eyes. They are reasonably called a super-product, as they are abundantly saturated with useful ingredients that moisturize and nourish the skin. In addition, Reviline Petals contain natural peptides of the vascular wall, bone and cartilage tissue and thymus. Due to them, the tone of the skin around the eyes is restored, it becomes smooth, soft and elastic, and regeneration process speeds up.

Peptides' fabric patches improve blood circulation and strengthen the walls of blood vessels, so your skin looks healthy and fresh after using them.

The Hydromoist Plus® complex based on seaweed in the Tightening Petals provides a visible lifting effect. Polylift® sweet almond seed extract evens out micro-relief of the skin and creates an instant lifting effect.

Petals for Puffiness are excellent helpers in the fight against puffiness under the eyes and dark circles. They contain Actiflow® yeast extract, which strengthens the capillary system and stimulates blood circulation. In addition, the peptide complex of the vascular wall (A-3), which is part of the Petals for Puffiness, normalizes the tone of blood vessels and regulates metabolic processes in them.

Reviline petals contain sodium hyaluronate, which improves skin tone and stimulates the formation of collagen fibers.

The petals from Peptides are drop-shaped. If you want to eliminate signs of fatigue, then place the wide part of the petal on the inside of the lower eyelid. If the need to smooth out wrinkles is more prominent, then act the other way around — put the petal with its «tail» inward, and with its wide part outward, on the area of crow's feet. Reviline Petals can be used in the morning and evening (no later than 2 hours before bedtime) for 15–30 minutes. It is not necessary to wash off the remnants of the product; they should be driven into the skin with light patting movements.

It is recommended to use Reviline Petals 1–2 times a week. They contain active ingredients in high concentration, so it is impractical to use them every day. Thus, one package can last up to a month.

TIGHTENING PETALS

Tightening petals are designed for emergency relief for the delicate skin around the eyes. Due to the active ingredients, it has an instant lifting effect, acting in the deep layers of the skin. They stimulate the processes of tissue regeneration, strengthen collagen skin and increase its elasticity, have an antioxidant effect, due to which a visible rejuvenation effect is achieved in the shortest possible time. The substances that make up the Petals regulate metabolic processes in the connective tissue and help to effectively tighten the skin.

Contains: **peptide complex A-4 (cartilage), A-6 (thymus)**, glucose, glycerin, prunus amygdalus dulcis seed extract, hydrolyzed collagen, sodium hyaluronate.

4 blisters by 2 petals

PETALS FOR PUFFINESS

Petals for Puffiness are designed for emergency relief for the delicate skin around the eyes. Thanks to its active ingredients and modern technologies, these products contribute to the rapid disappearance of edema and swelling. Petals normalize vascular tone, restore disturbed microcirculation, strengthen collagen skin and increase its elasticity, moisturize the delicate skin around the eyes, and have an antioxidant and anti-stress effect, due to which a visible rejuvenation effect is achieved in minimum possible time.

Contains: **peptide complex A-3 (vessels)**, glycerin, yeast extract, sodium hyaluronate.

REVILAB® EVOLUTION

A SERIES OF ANTI-AGE COSMETICS BASED ON PROFESSIONAL PEPTIDES

The REVILAB EVOLUTION series is aimed at a radical solution of the problems of age-related skin changes. It embodies all the best, most relevant and progressive achievements the field of anti-aging technologies and popular cosmetology.

The task of REVILAB EVOLUTION cosmetics is to awaken the skin's own restorative and protective abilities in order to eliminate imperfections, restore its freshness and flawless appearance.

The REVILAB EVOLUTION series begins with the **M-Revitalizer**, a unique anti-aging daily care product. It contains components that are considered the latest achievement in modern cosmetology. These are professional substances, each of which is designed to solve a specific problem. The task of moisturizing the skin and maintaining optimal hydration levels is performed by the Moist 24 ™ complex. Protection from aggressive environmental factors — overheating, ultraviolet radiation, air pollution — is provided by the Unirepair T-43 substance, which is in demand on the cosmetology market. It contains tyrosine, proline, adenosine triphosphate and vegetable protein hydrolyzate. This complex allows you to remove signs of stress, inflammation and redness, and protects the skin cells DNA from damage.

Two lipopeptides in the **M-Revitalizer** deserve special attention. The first is Syn®-Coll. It is considered to be an activator of major dermal matrix components such as laminin-5, type I collagen and transforming growth factor β, which controls many functions in most cells. Due to the inhibitory effect on metalloproteinases, Syn®-Coll can reduce the severity of wrinkles by 12% and achieve even more amazing results in the future, since it stimulates the synthesis of hyaluronic acid, as well as type I collagen (its production increases by 70%) and transforming growth factor β (its production increases by 35%).

The second lipopeptide is Progeline ™ (also found in **Revilab Evolution # 7** Anti-Aging Serum). This lipopeptide inhibits the production of progerin, one of the most important markers of skin aging. This product also inhibits the expression of elastases and matrix metalloproteinases of types 2, 3 and 9 — agents that destroy collagen and elastin in the skin. Against this background, the synthesis and assembly of collagen are optimized; the rate of production of components of the dermo-epidermal junction is accelerated. After 28 days of using products with Progeline ™, skin elasticity is improved by 20%.

The undisputed flagship of the REVILAB EVOLUTION series is the **Revilab Evolution №7** serum, which was created on the basis of the latest achievements in cosmetology. Not only is it able to resist the fundamental factors of aging, but also to eliminate the signs of skin aging. Serum **Revilab Evolution No. 7** solves several problems at once — to remove signs of aging and to gradually reconstruct all layers of the skin.

The primary effect — relieving fatigue, moisturizing the skin, giving it elasticity and radiance — is provided by Liftessense®, the extract of the large arboraceous fern, which forms the finest molecular network (a kind of veil), modulating the face contour and reducing the visualization of wrinkles within an hour by 10%.

Pomegranate seed extract and low-molecular hyaluronic acid restore elasticity of the skin and the integrity of the hydrolipidic mantle of the epidermis, which is perceived as an instant lifting effect.

Two professional components are responsible for the reconstruction of skin layers: Progeline and Matrixyl® Synthe'6 ™.

Of course, Matrixyl® Synthe'6 ™ can be called the main component of the serum, which restarts the synthesis of six main components of the matrix and the dermo-epidermal junction: collagen I, III, IV, fibronectin, hyaluronic acid, and laminin-5. In addition, Matrixyl® Synthe'6 ™ stimulates the production of heat shock proteins (Hsp: Hsp60, Hsp70, Hsp90), which have an anti-stress effect on the skin and set in motion matrix repair mechanisms through collagen and elastin.

One of the most important effects of Matrixyl® Synthe'6 ™ is to stimulate the synthesis of Hsp47, a chaperone that is involved in the assembly of collagen types I, II, III, IV and V.

The serum starts working within 5–10 minutes and develops its effect over several weeks, creating your new look day after day.

The REVILAB No. 3 series (Peptide Revitalizer and Eye-Line Filler) can be confidently called our main achievement in the field of professional cosmetics for home use. They contain a component of express lifting (HPE-4) and a pineal gland peptide — an inducer of telomerase and a restorer of fibroblast

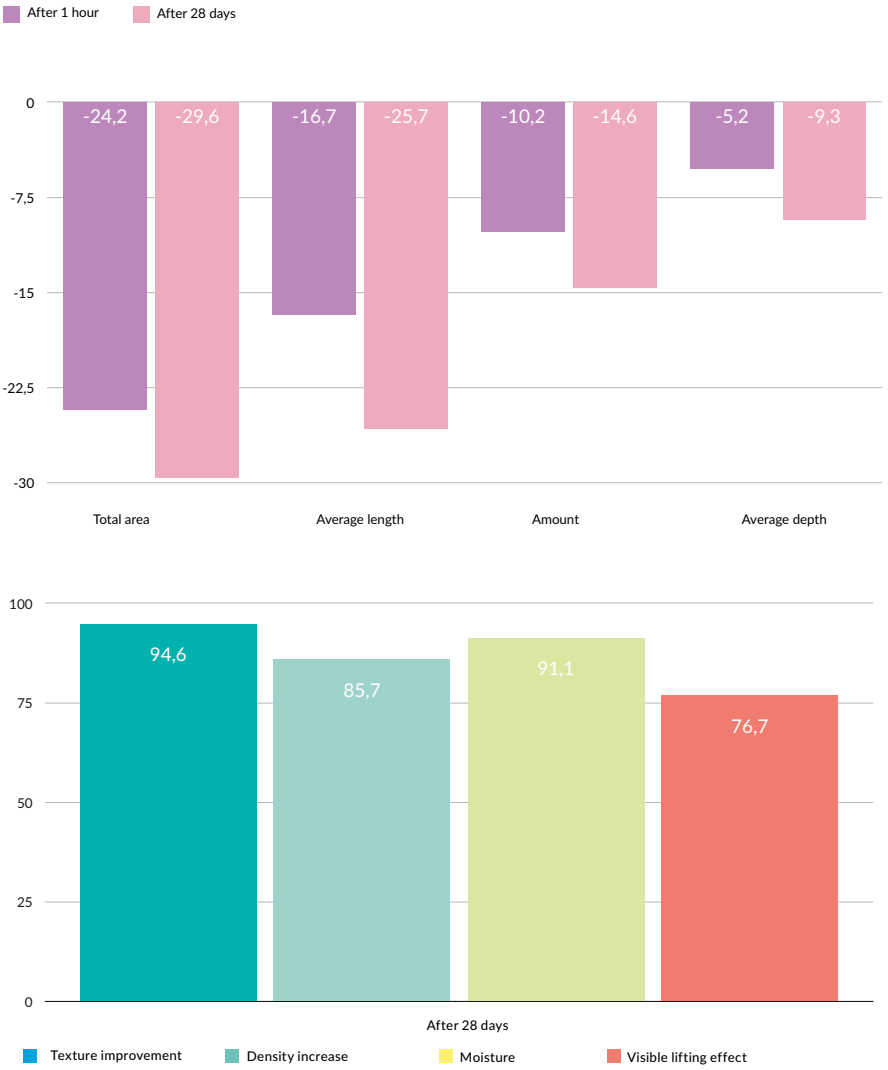

sensitivity to various stimulations. The pineal gland peptide exhibits telomerase activity in relation to cells affected by stress and various negative influences. The pineal gland peptide restores sensitivity to fibroblasts by enhancing the synthesis of extrapineal melatonin by Merkel neuroendocrine cells, as well as by direct telomerase activity. As a result, the number of CD44 receptors on the surface of fibroblasts increases significantly, which is an indisputable marker of their synthetic activity (synthesis of hyaluronic acid, procollagen, epidermal growth factor).

The Neodermyl component (found in the **Eye-Line Filler**) is responsible for the correct assembly of collagen from procollagen. Unirepair T-43 and Thermostressine® peptide (contained in the **Peptide Revitalizer**) are responsible for the formation of a protective shield on the surface layers of the skin.

Peptide Revitalizer is primarily designed to counteract the factors that accelerate skin aging and to activate all of the skin's defense mechanisms. In addition, Peptide Revitalizer contains Dermaxyl® [a complex of so-called stratum corneum cement (i.e. ceramides) and hexapeptide 12 (elastin fragment). This complex strengthens the epidermis and reduces transepidermal moisture loss, but most importantly, it allows you to utilize defective collagen and defective matrix components and prepare a site for the resynthesis of new elastin.

The **Eye-Line Filler** Series 3 is primarily aimed at the reconstruction of the dermal matrix and its correct assembly (Matrixyl® Synthe'6 ™, Neodermyl®). A fundamentally new peptide Leuphasyl®, which action is fundamentally different from that of other known peptides, allows reducing the existing epidermal and mimic wrinkles in the area around the eyes. This product is a mild calcium channel blocker that can gently and effectively control muscle tone. As a result of its application, the number of wrinkles around the eyes is reduced by 28%.

Revilab № 7.Wrinkle parameters. Sample of 56 women, age 36-45.

REVILAB EVOLUTION® №7

Anti-Aging Serum

This product is a modern premium skin re-enactor. Its main task is to restore youthfulness, freshness and elasticity to your skin. The serum fights against premature aging, improves skin condition and shapes the facial contours. It also moisturizes and smoothes the skin, visibly reducing deep lines and expression lines. It includes lipopeptides with an intelligent system for delivering molecules to target cells. The serum works in several stages, weakening the influence of genetically programmed aging factors, and helps to reverse the pre-existing age-related changes.

Peptide Progeline ™ — the main component of this serum — consists of three amino acids, slows down the aging process at the cellular level, having the ability to inhibit the synthesis of the main protein of aging — progerin, and provides a complex modeling effect. The Matrixyl® synthe'6 ™ peptide in the serum prevents the appearance of new wrinkles and reduces the appearance of existing ones. The Liftessense ™ component, thanks to the formation of some kind of pellicle of a reticulate structure on the skin surface, which helps to increase the skin tone and elasticity, and gives an instant lifting effect. Low-molecular hyaluronic acid penetrates into the deep layers of the skin, providing it with elasticity and good blood supply due to the ability to retain water in the tissues. Pomegranate seed extract contains essential polyunsaturated fatty acids and biologically active substances that have a pronounced anti-aging effect. Evening primrose oil has a regenerating effect, perfectly moisturizes and nourishes the skin.

Contains: peptide Progeline™, peptide MatrixylR synthe'6™, Liftessense (Cyathea cumingii leaf extract), evening primrose oil, hyaluronic acid, pomegranate seed extract.

REVILAB® Nº3

PEPTIDE REVITALIZER

Facial Revitalizer with Telomerase Inducer

A highly active cream based on professional peptide substances that strengthens and energizes the skin, fights dehydration, a dull complexion and wrinkles. Its task is to restore the natural strength of the skin, erase signs of age-related changes and signs of fatigue. The complex of peptides quickly restores the work of cells and promotes the regeneration of the skin matrix. The combination of low-molecular hyaluronic acid and plant extracts helps rejuvenate and nourish the skin.

Contains: **: peptide complex AA-1**, HPE-4, wheat germ oil, coffea arabica seed oil, evening primrose oil, Unirepair T-43, **Thermostressine®, Dermaxyl®**, amaranthus seed extract, pomegranate seed extract, hyaluronic acid, vitamin E, coenzyme Q10.

20 ml

EYE-LINE FILLER

Filler for the Skin around the Eyes

The combination of the pineal gland peptide complex, plant extracts and hyaluronic acid has a systemic effect on the skin around the eyes, making it look younger and healthier, more elastic, hydrated, toned, and fine wrinkles are filled from the inside. EYE-LINE FILLER provides a cumulative effect, rejuvenating the skin for a long time.

Contains: **peptide complex AA-1, MatrixylR synthe´6™**, ™, sweet almond oil, peach kernel oil, coffea arabica seed oil, HPE-4, **Lanacityn® PF**, Leuphasyl®, Lanablue™, Neodermyl®, hydrogenated castor oil, hyaluronic acid, salvia officinalis (sage) leaf extract, pomegranate seed extract, horse chestnut extract, vitamin E.

SPA LINE

PEPTIDE-BASED COSMETICS FOR BODY AND HAIR CARE

SPA LINE was created taking into account modern trends and the latest technologies in SPA cosmetology. The SPA LINE products include peptides, the Neovitin® bioantioxidant complex and the Aktivitin® bioflavolipid complex.

Due to the peptides that make up the cosmetics, the process of independent cell regeneration is initiated. Peptides are excellent conductors of active substances from cosmetics to skin cells and hair follicles.

The best effect can be achieved using products in which peptides are combined with valuable oils, algal and plant extracts, as well as with various vitamin complexes.

Note that the SPA LINE hair care products are enriched with milk proteins, which have moisturizing, softening and regenerating properties. These products are alsoenrichedwith amino acids, which eliminates flaking and makes your skin smooth.

SPA LINE body and hair care products do not contain parabens, sulfates or dyes, and do not cause allergies. During their development, the latest achievements of the cosmetic industry and formulations with natural ingredients were used. This combination allows you to achieve a flawless, well-groomed appearance and a sense of inner harmony.

ACTIVE INGREDIENTS OF SPA LINE PRO DUCTS

Cocamidopropyl betaine is a mild amphoteric surfactant made from coconut oil fatty acid amides. It is one of the most gentle and safe surfactants. This ingredient has an antistatic and conditioning effect on the hair; it facilitates combing dry and damaged hair, provides high-quality scalp care, and provides pleasant cleansing and thick foaming.

Sodium lauroyl methyl isethionateis a very mild anionic surfactant that gently cleanses the scalp without damaging the hair proteins and provides a pleasant creamy lather.

Cocoglucoside is a natural amphoteric surfactant, soft foaming agent, which is obtained from dried coconut pulp and fruit sugar. As part of the shampoo, it smoothes the hair structure and adds volume.

Sodium lauroyl sarcosinate is a new generation natural anionic surfactant derived from sarcosine, a natural amino acid found in fruits and vegetables. A gentle cleanser that is safe for the skin while effectively removing dirt, bacteria and sebum. Sodium lauroyl sarcosinate does not dry out, and it is even suitable for sensitive skin. When caring for hair, this ingredient returns vitality and radiance to it, gently cleansing and improving its texture.

Peptide complex of the vessel wall A-3 (AA-7 in shampoo) strengthens the walls of superficial vessels, improves blood microcirculation in the scalp and restores the nutrition of hair follicles.

Peptide cartilage complex A-4 (AA-9 in shampoo) strengthens the hair roots in the hair follicles, improving the scalp structure.

Thymus peptide complex A-6 (AA-2 in shampoo) stimulates the regeneration of hair follicles and increases local nonspecific skin immunity.

HPE–4 Anti-Aging Complex strengthens hair follicles, prevents and stops hair loss.

Milk proteins effectively repair, moisturize and soften hair, making it more manageable, smoother and more agreeable to the touch. These ingredients contain essential amino acids responsible for nourishing the skin and producing keratin, collagen and elastin.

Yoghurt powder has the unique properties of conditioning and strengthening the hair shaft without accumulation. It also helps restore the normal pH of the scalp, effectively moisturizes the scalp, and makes your hair soft and shiny.

The extract of natural wheat gliadin protein acts as a building material, penetrates into the depths of the hair shaft under the cuticle scales to the places with lacks of protein and fills the voids and unevenness in your hair. It also helps to restore the damaged structure of dry and brittle hair.

Olive oil softens, nourishes the scalp and hair follicles, fights against inflammation, flaking and dryness, and helps to restore your hair structure, making it silky and filling it with a satin shine.

Castor oil softens and nourishes the scalp and hair follicles, eliminates dryness and flaking, ensures the formation of keratin that sticks split ends together, prevents breakage, and restores elasticity and smoothness to hair.

Ethylhexylcocoate has the ability to link the scales of the hair cuticle.It also softens and moisturizes dry damaged hair, and instantly creates a mirror-like effect.

PEPTIDE SHAMPOO®

for All Hair Types

The shampoo adds vitality, firmness and volume to your hair. It contains components that do not damage the protein structure of the hair and have an exceptionally mild washing effect. This product allows you to achieve and maintain a constant level of skin acidity, close to normal. It also provides a good cleansing and mild degreasing effect, which prevents scalp diseases. With regular use, it restores the structure of damaged hair and gives it a healthy appearance.

Contains: **peptides complexes AA-7 (vessels), AA-9 (cartilage), AA-2 (thymus)**, bioantioxidant complex Neovitin®, HPE-4, Hydrolysed Milk Protein, Yogurt Powder.

200 ml

PEPTIDE BALSAM®

Hair Conditioner

The conditioning balm enhances the effectiveness of the shampoo. It is designed for intense nutrition and full hydration. It acts at the intracellular level, reconstructing the hair structure, making it stronger and firmer, strengthening and regenerating it from the inside. As a result, the main tasks are solved: the hair structure is restored, its strength is increased, and your hair being filled with vitality becomes smooth to the touch. A healthy shine returns to your hair.

Contains: **peptide complexes A-4 (cartilage), A-6 (thymus)**, olive oil, bioflavolipid complex Aktivitin®, extract of natural wheat protein gliadin.

200 ml

PEPTIDE CREAM-MASK®

Hair Mask

The cream-mask penetrates deeply into the hair structure and restores its damaged layer. It activates metabolic processes in the scalp, improves blood supply to hair roots, improves the condition of hair follicles, and stimulates metabolic processes in the roots and blood supply to scalp cells. The mask protects hair from aggressive environmental influences, makes it shiny, smooth and silky, and enriches it with nutrients.

Contains: **peptide complexes A-3 (vessels), A-4 (cartilage), A-6 (thymus)**, olive oil, castor oil, bioantioxidant complex Neovitin®, extract of gliadin (natural wheat protein), ethylhexylcocoate.

160 ml

PEPTIDE CREAM-SOAP®

Cream-Soap

The cream-soap is a unique remedy for fighting against irritation, dryness, flaking and redness of the skin. This product effectively cleanses and disinfects, also tones up and smoothes the skin, restoring its health and softness. Thymus peptides stimulate the regeneration of skin cells, strengthen its collagen structure, increase elasticity andhave an antioxidant effect. Cartilage peptides contribute to skin tightening and regulate metabolic processes in the connective tissue.

Contains: **peptide complexes A-4 (cartilage), A-6 (thymus)**, glycerin, bioflavolipid complex Aktivitin.

Recommendations for Using Spa Line Soaps

Peptides' solid soaps are real organic products. They do not contain artificial flavors or colors. Their aroma is created exclusively through a combination of essential oils and herbal extracts. In addition, the Anti-aging and Caring Soaps are handmade.

Peptides' solid soaps are suitable for cleansing body skin, hands and face. So, Anti-aging Soap can be used to remove makeup. Both soaps contain vegetable glycerin. It improves skin elasticity and removes dryness. Glycerin contributes to the rapid restoration of the epidermis, as it is hygroscopic (its molecules absorb and accumulate moisture and, due to its small size, penetrate deep into the skin, contributing to the saturation of moisture in all its layers). In addition, glycerin has a protective function — filling fine wrinkles and microcracks with moisture, it prevents dust particles and microorganisms from entering the upper layers of the skin and thereby protects the epidermis from inflammation and irritation.

Many oils are also involved in the composition of soaps. So, due to olive oil, solid soaps produced by the Peptides company can be used to cleanse dry and sensitive skin, as it acts very delicately and gently. Cocoa butter gives the Caring Soap its creamy foam, nourishes and tones your skin, making it soft and smooth. Castor oil perfectly softens the skin and promotes its regeneration. Camelina oil improves your skin tone, stimulates cell metabolism and prevents premature skin aging.

Plant extracts of chamomile, linden and calendula provide an antiseptic effect, and carefully protect your skin from aggressive environmental influences.

Vitamin E, which is part of the soaps, has antioxidant properties. Vitamin F helps to maintain the hydrolipidic balance of the skin, and it is also effective for the correction of acne breakouts. Due to the combination of vitamins E and F, the protective barrier of the epidermis is restored and skin youthfulness is maintained.

After using our soap, a pleasant sensation of freshness persists. During use, it does not crack or get soggy.

ANTI-AGING SOAP

CONTAINS PEPTIDES

Handmade, Peptide-Based

Not only does the soap gently cleanse and moisturize the skin, but also protects it from aging. This is ensured by highly active components — copper-containing peptide (GHK-Cu), HPE-4 and a whole range of plant extracts. The soap tones up and refreshes the skin, as well as improves mood and gives a boost of vivacity for the whole day.

Contains: Copper Tripeptide-1 (GHK-Cu), HPE-4, HPE-4, Saponified Vegetable Oils (Olive Oil, Camelina Oil, Coconut Oil, Palm Oil, Corn Oil, Castor Oil), Glycerin of Vegetable Origin, Olive Oil, Castor Oil, Grapefruit essential oil, Vitamins E, F, Lactic Acid.

100 g

CARING SOAP

Handmade

The soap has a soothing and anti-inflammatory effect. Modern anti-age components HPE-4, filtrate of the secretion of the grape snail in combination with natural oils and plant extracts help prevent skin aging, nourish, increase elasticity and moisture, improving its texture and quality. It also has antiseptic properties, gently and carefully cleanses the skin, restoring its health and comfort.

Contains: HPE-4, Helix Aspersa Snail Secretion Filtrate, Saponified Vegetable Oils (Olive Oil, Camelina Oil, Coconut Oil, Palm Oil, Corn Oil, Castor Oil), Glycerin of Vegetable Origin, Olive Oil, Theobroma Cacao Seed Butter, Chlorophyll paste, Chamomilla Recutita Flower, Tilia cordata Flower, Calendula Officinalis Flower, vitamins E, F, Complex Glycoderm™.

MESOTELS FOR EXTERNAL USE

INNOVATIVE TECHNOLOGIES FOR BEAUTY AND HEALTH

Mesotels have long established themselves as effective anti-aging complexes for the scalp, body, face and neck. In order to influence the maximum number of links in the development of premature skin aging, the anti-aging complex HPE-4 (a new generation of biogenic amines) and Neovitin® were created.

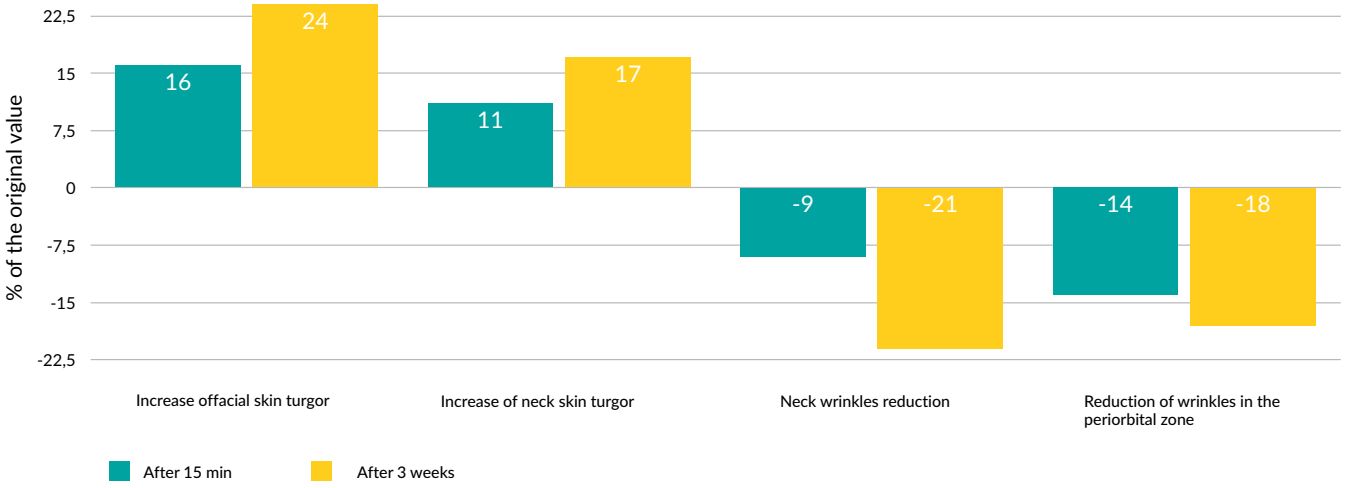

HPE-4 belongs to a new generation of biogenic amines. This component makes it possible to smooth out fine wrinkles, moisturize the skin, increase its elasticity and significantly improve its texture.

The most important aspect of HPE-4 activity is associated with an immediate reduction of keratinocytes (lifting) and a decrease in transdermal skin moisture loss.

Neovitin®, for its part, increases the efficiency of HPE-4 by 23% (clinically proven), improves microcirculation, and increases the antioxidant status of the skin, preventing photo aging.

Biologically active complex Neovitin® has anti-inflammatory, UV-protective, regenerating, antimicrobial, immunomodulatory and antitumor effects.

Mesotel for face and neck. 100% efficiency. Sample of 38 women, age 40-43 years

MESOTEL®
for Scalp

This product stimulates hair growth, prevents dandruff, early graying and hair loss, strengthens hair follicles, increases hair elasticity, and improves scalp condition.

SCALP MESOTEL

Scalp Mesotel is a part of the hair care program. It helps restore normal scalp acidity.

This product is recommended for use in combination with PEPTIDE BALSAM. Apply 2-3 ml of Mesotel to the scalp and rub in with massaging movements. Leave on for 30 minutes and then rinse the scalp and hair. Do it daily. The duration of the use is 3 months.

Contains: HPE-4, bioantioxidant complex Neovitin®, glycerin, burdock extract, hop extract, nettle extract, panthenol, tartaric acid.

50 ml

MESOTEL®
for Body

This product smoothes fine lines, has a moisturizing effect, improves skin elasticity and texture. It also has a lifting and anti-cellulite effect.

BODY MESOTEL

It is recommended to apply 4-6 ml of Mesotel to cleansed body skin and rub in with massaging movements until completely absorbed. Use it daily. The duration of the use is 3 months.

Contains: HPE-4, bioantioxidant complex Neovitin®, glycerin, horsetail extract, aralia extract, artichoke extract, panthenol, succinic acid, lactic acid.

50 ml

MESOTEL®
for Face and Neck

Gives the most prominent anti-aging effect for this class of products: smoothes fine lines, moisturizes the skin of the face and neck, improves elasticity and skin texture.

MESOTEL FOR FACE AND NECK

It is recommended to apply 2-3 ml of Mesotel in the evening on the previously cleansed skin of the face and neck, and rub in with massaging movements until completely absorbed. The duration of the use is 3 months. The first month you can use this product daily, and then reduce it to 1-2 times a week.

Contains: HPE-4, bioantioxidant complex Neovitin®, glycerin, rosemary extract, panthenol, succinic acid, citric acid.

DECORATIVE COSMETICS

INTENSE LOOK AND SEDUCTIVE LIPS WITH PEPTIDES' PRODUCTS

Currently, multifunctional products are very popular on the decorative cosmetics market. After all, the pace of life of a modern woman accelerates day by day, and today makeup cosmetics should not only create a vivid image, but also provide skin care, preventing premature aging.

The composition of decorative cosmetics includes natural peptides of the vascular wall, bone and cartilage tissue and thymus. These peptides have a beneficial effect on the restoration of microcirculatory blood flow and improve skin nutrition. Bone-cartilage tissue peptides strengthen the hair follicles of the eyelashes and restore a strong anchoring system of the hair in the bulb and surrounding tissues. Thymus peptides activate local skin immunity and healing processes.

Decorative cosmetic products from Peptides are much more than just make-up cosmetics. In addition to beauty, they take care or your health.

A TRIUMPH OF NATURAL BEAUTY

The term **nude makeup** comes from the word «nude», which means «naked» in English. Nude makeup should look as natural as possible. Hence the main rule: no bright shades. Nude makeup is based on soft hues.

Brown mascara and transparent lip balm are the bare minimum for a lightweight makeup.

The moisturizing, radiant textures of PeptideLips balms create the most natural effect on the lips and give them a fresh, healthy look. PeptideLashes mascara allows you to thoroughly color your eyelashes from root to tip, giving them volume and expressiveness.

Experts recommend after washing (you can use PEPTIDE CREAM-SOAP) and applying a toner (consider the pH-Balance Toner from the REVILINE series) to apply a moisturizing face cream (e.g., RN 07 Clean Skin). After it is absorbed, you can proceed directly to the makeup. It is crucial to avoid a lot of foundation and intense shades and apply cosmetics in thin layers.

It is easy to look perfect with a nude makeup.

PeptideLashes® Mascara

Black, Brown

PeptideLashes® mascara provides even coverage. It does not smudge or flow, leaving lashes lush and expressive.
The peptide complex of cartilage tissue restores collagen synthesis. This means that your eyelashes will become stronger and thicker. «Neovitin» ® complex protects eyelashes and eyebrows from inflammatory processes, accelerates their growth and regeneration. The string extract has a photo protective effect — it protects against UV rays.
The curved silicone brush paints over each lash, allowing you to apply makeup quickly and accurately.

Contains: peptide complex A-4 (cartilage), Panax Ginseng Cell Culture Extract (Neovitin®), Bidens Tripartita Flower/Leaf/Stem Extract.

7 ml

PeptideLashes® Cream-Balm

Cream-Balm for Eyelashes

Cream-balm for eyelashes nourishes and strengthens the roots of eyelashes, restores their structure and color, stimulates growth and improves appearance. This product is perfect for the care of loose, thin lashes. The eyelash balm can be applied both at night and under main makeup.

Contains: peptide complexes A-4 (cartilage), A-6 (thymus), Panax Ginseng Cell Culture Extract (Neovitin®), Castor Oil, Beeswax, Bidens Tripartita Flower/Leaf/Stem Extract, Lupinus Albus Protein.

7 ml

PeptideLips® Balm

Lip Balm

From the first application, this lip balm provides comfort, perfectly moisturizes and relieves the sensation of dryness, promotes the regeneration of the skin of the lips, accelerates the healing of cracks and slows down the aging process. This product also improves microcirculation and tissue trophism, has an immunostimulatory effect, accelerates the process of soft tissue regeneration, and protects against UV rays and negative environmental influences. PeptideLips® Lip Balm helps prevent inflammatory diseases.

Contains: peptide complexes A-3 (vessels), A-6 (thymus), Neovitin®.

10 ml

PeptideLips® Balm

Lip Gloss Balm

This product provides the lips with comfort, perfectly moisturizes and relieves them of dry sensations, promotes skin regeneration, accelerates the healing of cracks and slows down the aging process. It also improves microcirculation and tissue nutrition, has an immunostimulating effect, accelerates the process of soft tissue repair, and protects against UV rays and negative environmental influences. PeptideLips® Lip Gloss Balm helps prevent inflammatory diseases and gives the lips a shine and glory.

Contains: peptide complexes A-3 (vessels), A-6 (thymus), Neovitin®.

REVIDONT®

REVIDONT® PROFESSIONAL

MOUTH CARE PRODUCTS

Proper daily care of your teeth and gums is the key to a beautiful and healthy smile.

REVIDONT PROFESSIONAL is an innovative series with a very specific principle of operation. Not only does it allow you to fight the symptoms, but also to influence the very cause of oral diseases. The REVIDONT PROFESSIONAL line contains non-abrasive polishing agents that are gentle on enamel. The exclusivity of this series is due to the group of innovative patented bioactive complexes and natural peptides included in it, which are acting in various groups of cells at the DNA level.

We are used to think that perfect dental health costs a lot of money and you have to spend many hours in the dentist's chair. But the best guarantor has always been and will be basic mouth care, which we provide ourselves at home.

The Main Active Ingredients of the REVIDONT PROFESSIONAL Products:

1. **Peptides of blood** vessels strengthen the walls of capillaries, improve microcirculation and trophism of oral tissues of the oral cavity, and reduce bleeding of the gums.

2. **Peptides of bone and cartilage tissue** provide a regenerating effect on the bone tissue of the jaw, strengthen the structure of the teeth and stimulate the synthesis of enamel.

3. **Peptides of the thymus** have a regenerating, trophic, immunostimulating effect;they accelerate the process of restoration of soft tissues during periodontal disease, stomatitis and gingivitis.

4. **Mumijo** is a natural biostimulant that significantly accelerates the rate of regeneration of the oral mucosa and gums.

5. **Silicon dioxide and titanium dioxide** are modern non-abrasive polishing agents that provide highly effective cleaning of teeth and are gentle on tooth enamel.

6. **Sodium monofluorophosphate** is a fluorine-containing component that prevents the development of caries and strengthens tooth enamel.

7. **Pyrophosphatesare** a group of components that help remove plaque and enhance protection against caries. Pyrophosphates prevent the setting of microorganisms on the surface of the teeth.

8. **Bioflavonoid complex Activitin®** is a patented two-vase extract of sage, chamomile, calendula and St. John's Wort. The extract which is obtained from these plants contains a wide range of biologically active substances, both lipophilic (chlorophylls, carotenoids, phytosterols, terpenoids, fat-soluble vitamins) and hydrophilic (bioflavonoids, tannins, water-soluble vitamins), which have a comprehensive healing effect on the mucous membrane of the mouth and gums. The biologically active substances contained in the extract have a beneficial effect on the mucous membrane and gums, relieve the inflammatory response, and solve the problems of vitamin nutrition, moisturizing, regeneration, antioxidant and antimicrobial protection.

9. **Bioantioxidant complex Neovitin®** is a fraction obtained by a patented technology from the biocultured cell mass of ginseng root. This ingredient has a prominent antioxidant and antitumor activity. The active components of Neovitin® promote the production of not only antioxidant enzymes in the body, but also interferon. This inhibits the reaction of lipid peroxidation of cell membranes, strengthens tissues, thereby increasing the body's adaptive resources.

10. Birch bark extract — **Betulavit®** — an exclusive component with the most valuable pharmacological properties: anti-inflammatory, antibacterial, antifungal and regenerating. It helps to accelerate the healing of the oral mucosa and gums, reduce tooth mobility and helps fight periodontitis, stomatitis and bad breath due to its prominent antibacterial properties.

11. **Hydroxyapatite** is a component related to tooth enamel. Hydroxyapatite seals the enamel and improves the structure by filling microcracks (micro-filling effect).

REVIDONT®

Toothpaste Enamel Restoration and Reduction of Tooth Sensitivity

This toothpaste contains peptides of vessels, cartilage tissue and thymus, which are used for bone tissue regeneration. It also contains potassium citrate, which reduces the sensitivity of enamel and dentin, hydroxyapatite, which is responsible for remineralization, zinc citrate, which slows down the formation of plaque and supragingival calculus, and Neovitin®, which has anti-inflammatory, antioxidant and regenerating effects.

Contains: **peptide complexes A-3 (vessels), A-4 (cartilage), A-6 (thymus)**, birch bark extract Betulavit®, bioflavolipid complex Aktivitin®, bioantioxidant complex Neovitin®.

63 g

REVIDONT®

Oral Care Peptide-Based Elixir

Mouth care elixir is aimed at strengthening the tooth enamel, protecting teeth from caries, and suppressing the reproduction of pathogenic flora. Lemon essential oil has an antiseptic effect, reduces the severity of inflammatory processes, and gently refreshes your breath. The components of lemon essential oil accelerate the regeneration of periodontal tissues and have analgesic properties. Penetrating through the dentinal tubules, they block nerve irritation and quickly and effectively reduce painful sensations.

Contains: hydroxyapatite, sorbitol, xylitol, caprill glycol, sodium fluoride, lemon essential oil, limonene, eugenol, **peptide complexes A-3 (vessels), A-4 (cartilage), A-6 (thymus).**

15 g

REVIDONT®

Bamboo Toothbrush

A bamboo toothbrush is an environmentally friendly, hypoallergenic oral hygiene product. It makes a healthful effect on teeth and gums, made of biodegradable materials, which allows you to take care of the environment. Nylon polymer bristles do not injure the gums and enamel of the teeth; it helps to effectively remove plaque, and also delicately whiten teeth. The handle of the toothbrush is made of natural bamboo, which does not absorb moisture, does not slip in the hand and does not grow moldy. Our product portfolio includes two versions of the toothbrush: with a blue and a red stripe.

Materials: nap — Nylon — is a biodegradable polymer that is durable and wear-resistant when rubbed; it is distinguished by high cleaning ability; handle — dried, crushed and pressed bamboo stem.

Gum Balm

The gum balm is designed to prevent gum disease, and it has powerful immunostimulatory and anti-inflammatory effects. The gum balm also has a regenerating effect on the jaw bone tissue; it accelerates the process of soft tissue restoration in case of periodontal disease, stomatitis and gingivitis. This product strengthens the teeth structure and stimulates the synthesis of enamel, improves microcirculation and nutrition of oral cavity tissues, reducing the gum bleeding.

Contains: bioantioxidant complex Neovitin®, **peptide complexes A-3 (vessels), A-4 (cartilage), A-6 (thymus)**.

15 g

REVIDONT®
Peridontal Disease Prevention Toothpaste
with Neovitin ®

Toothpaste with «Neovitin» ® for effective prevention of periodontal disease has anti-inflammatory, antioxidant, antibacterial, and regenerating effects. It prevents the formation of allergies and candidiasis in the oral cavity, strengthens tissues, thereby increasing the body's adaptive resources. Complex «Neovitin» ®, isolated from the cellular structure of ginseng, and «Betulavit» ® (birch bark extract) both have antioxidant and anti-inflammatory effects.

Contains: birch bark extract Betulavit®, bioflavolipid complex Activitin®, bioantioxidant complex Neovitin®.

63 g

REVIDONT®
Peptide-Based Toothpaste with SOD for Oral Disease Prevention

Toothpaste with peptides and superoxide dismutase (SOD) is effective for the prevention of caries and as part of the complex treatment of gingivitis, periodontitis and stomatitis; it has a regenerating, anti-inflammatory, tonic, and antioxidant effect. Toothpaste with peptides and SOD improves microcirculation and nutrition of periodontal tissues, reducing bleeding gums, strengthens the structure of teeth and stimulates enamel synthesis, stimulates local immunity of the oral cavity, and prevents the formation of dental plaque.

Contains: **peptide complexes A-3 (vessels), A-4 (cartilage), A-6 (thymus)**, superoxide dismutase, peppermint essential oil.

63 g

REVIDONT®
Caries Prevention Toothpaste with Mumijo

Toothpaste with mumijo is specially designed for caries prevention. It contains mumijo, a natural biostimulant, which significantly accelerates the rate of regeneration of the oral mucosa and gum tissue. The fluorine-containing component of sodium monofluorophosphate prevents the development of caries and strengthens the tooth enamel. Complex Activitin® makes an antimicrobial effect on the mucous membrane of the mouth and gums, and relieves the inflammatory response.

Contains: bioflavolipid complex Activitin®, mumijo.
